Brymill Cry-Ac Liquid Nitrogen Spray
Made in the USA and the number 1 choice of dermatologists worldwide, the Brymill cryosurgery device is unsurpassed for safety, versatility and precise control.

- Ergonomic design. Slim finger tip trigger for maximum control and easy viewing
- Suits left or right hand users
- Superior valve system operated for longer without clogging up with contaminants
- Durable stainless steel and solid brass construction
- 3 Year warranty
- Anti-topple flange for extra stability

Model B800 - 0.3L
- Smaller size for easier handling
- 300ml capacity
- 50 to 60 freezes at an average of 10 seconds each
- 21.5cm tall, weighs 715g when full

$1149
DALB800

Model B700 - 0.5L
- Larger size for greater capacity and longer holding time
- 500ml capacity
- 80 to 100 freezes and an average of 10 seconds each
- 29cm tall, weighs 895g when full

$1149
DALB700

Which one to select?
Select the size that is appropriate for your expected level of usage and for your weight/height preference. Many physicians (especially those with smaller hands) prefer the 300ml flask because it is smaller, lighter, especially easy to manoeuvre, and has sufficient capacity for their expected daily usage.

Dewar 21 Litre - 21XT
Stronger. Sturdier. And built to perform.

The Extended Time dewar is designed for long-term storage at cryogenic temperatures under rugged conditions.

Innovative features that work harder for you:
- Rugged construction: ribbed high-strength aluminum body
- Durable design
- Superior vacuum performance: added super insulation for maximum holding times
- Reliable: designed and built to stringent specifications, backed by a five-year vacuum warranty

WALMAY Cryospray

The Walmay Cryospray has given over two decades of proven reliable service to Medical Practitioners. It is the instrument of choice for Dermatologists and Practitioners.

Features
1. Thicker sheathing around the Probe, giving it greater tensile strength.
2. Improved metallurgical principles in construction of the flask collar.
3. The centre of gravity of the Walmay Cryospray is towards the top of the instrument, making it easy for the doctor to balance and steady the instrument in operation.
4. Fine gauze strainer on the end of the siphon tube reduces contamination accessing the regulator mechanism.
5. The carry bag contains five spray tips, instructions for use and FIVE YEAR warranty card.
6. The base stand ring provides a greater surface area for stability of the instrument when not in use.

Contents:
- 0.3L Flask capacity
- Set of four cone-shaped spray tips for accurate visual aiming during treatment
- One curved spray tip for body orifice surface treatment
- 5 year warranty
- Table stand for product stability
- Carry bag for easy transport from surgery to surgery

$895

Total Package $2095

Measuring rod
The measuring rod will clearly show the LN2 level of a dewar in inches and centimetres to 92cm/36"

$15.00

Ladle 20 litre
We recommend having a ladle as backup when purchasing an extractor.

$85.00

Extractor 21 Ltr
Liquid Nitrogen extractor for filling cryospray

$165.00

Polar Grip Gloves
- Gloves that shed water, resist salts and chemicals
- Rough-finish PVC coating provides gripping power on wet and slippery surfaces.

$29.00

There is an ever increasing need to remove skin lesions for both cosmetic reasons or medical necessity. With the CryoPen, accuracy to the millimetre is achieved by simply pointing the micro-fine jet of cryogen onto the lesion and treating for the appropriate length of time. Rapid, stressless and precise application avoids treating healthy tissue and promotes a better quality of care. This improves your treatment modality.

Lesions to be treated, but not limited to: Plantar Warts | Porokeratosis | Dermatofibroma Molluscum Contagiosum | Sebaceous Hyperplasia Actinic and Seborrhoeic Keratosis Condyloma | Poplar Nevi | Skin Tags Viral Verrucae | Lentigo

My experience with the Cryopen

I believe you have to experience this product first hand, to really understand how good it is. Every time I’ve given a doctor a unit to trial, it has never come back.

It’s lightweight, portable and super easy to use! The pin point accuracy has to be seen to be believed.

You end up with great results for the patient, which I think is important.

I highly recommend the Cryopen. If you would like a demo, I’m more than happy to drop in! Give us a call.

Unparalleled Cryotherapy
The CryoPen is a portable, innovative and efficient cryosurgical device.
It uses nitrous oxide cartridges as a cryogen and pinpoint accurate applicators to deliver the micro high pressure jet directly to the lesion. Only the abnormal tissue is treated within seconds.

Here’s how the CryoPen will benefit you:
• The CryoPen easily adapts to every lesion, regardless shape or size
• Extreme control over the procedure avoids any collateral damage
• Only minor discomfort allows longer and deeper freeze
• More effective treatment will result in fewer repeat visits

The patient will only experience minor discomfort and as a result will allow for longer treatment and deeper freeze for more effective results. No anesthesia, little to no pre-operative skin preparation or post-operative care is needed.

The CryoPen is a great unit for lesion treatment of children and adults. By pointing the CryoPen’s micro-jet directly to the lesion the application is accurate to the millimetre. It treats only abnormal tissue avoiding collateral damage to adjacent healthy tissue.

CryoPen | m
• Full control with on/off switch
• Ready for use with 8g cartridge
• Comes with 2 micro-applicators for ultimate accuracy and flexibility

BIOPEX302M $1,495

CryoPen | x
• Full control with on/off switch
• Comes with 4 micro-applicators for ultimate accuracy and flexibility
• Flexibility to either use 8g or 16g cartridge

BIOPEX201X $1,895
