Solugel
Wound care gel
Provides a soothing, moist healing environment for the effective treatment of minor burns, scalds and sunburn and relief of the pain and itchiness of chickenpox and shingles rash. Solugel is also excellent for the treatment of chronic ulcerative wounds, cuts and grazes.

50g J10340  12+ $9.63*  3+ $9.34*

Nu-gel
Hydrogel with alginate
NU-GEL™ Hydrogel is a transparent hydro active amorphous gel containing sodium alginate that gently and effectively debrides necrotic tissue and fibrinous slough.

15g KCIMNG415  5+ $7.51*  3+ $7.34*

Solosite gel
Hydrogel Wound Dressing
- Preserved for multi-dose dispensing
- Effective debrider and deslougher
- Promotes moist wound healing
- Cost-effective

20g SN36100614 Tube $8.12*  3+ $7.52*
50g SN36361354 Tube $9.76*  3+ $9.10*

Intrasite gel
Premium Desloughing and Debriding Hydrogel

8g SN7308 Tube $11.16*  3+ $10.34*
15g SN7311 Tube $12.77*  3+ $11.83*
25g SN7313 Tube $18.07*  3+ $16.62*

Nu-gel
Hydrogel Impregnated Non-Woven Dressing
A conformable hydrogel dressing which combines the advantages of IntraSite Gel with a non-woven dressing to help in the gentle packing of deep, open or undermined wounds. The non-woven substrate ensures the gel remains in close contact with the entire wound surface. It is suitable for use in necrotic, sloughy and granulating wounds, and helps create a moist wound environment to facilitate healing.

10 x 10cm SN66000324  Box/10 $130.32
Hydrosorb®
Transparent hydrogel sheet
- Supports and protects superficial burns and painful conditions
- The soft elastic properties creates a cushioning effect to protect the wound
- Soothes painful wounds for greater patient comfort and tolerability
- Keeps granulation tissue and young epithelium moist to encourage wound healing
- Can remain on a wound for up to 7 days
Indications: minor burns, insect bites, painful wounds

Hydrosorb
Hydrosorb will require a retention tape or bandage. Best for fragile skin.

Meet our Team: Sharon
Sales - Sydney

One of our most popular Sydney-based sales reps, Sharon, is actually a shape shifter who is able to be all of our people in a single encounter. Having started at Team Medical as a team member in the warehouse, Sharon’s product knowledge and exceptional multitasking abilities helped her move into customer service. It was quickly evident that Sharon can talk to our customers in the field, answer questions about almost anything, process orders and check accounts at the same time as talking fluent warehouse and delivery lingo.

It was these key attributes that had Sharon move into a sales rep role. But that’s not all the key to her success! Sharon has a memory for detail and considers our customers more like friendships (in the same way we think staff are family). To say she loves her job would probably be putting it mildly, but if she makes a promise to a business in the Hills territory, failure to deliver is unthinkable.

She is a popular and long-time member of Team Medical staff and it’s not surprising she’s social at our socials because she loves people and fosters a camaraderie built on trust and helping each other.

Sharon is a mother of 4 and grandmother as well, and it’s good she loves the road so much because her hobbies are cycling, hiking and travelling.
Debrisoft® Monofilament fibre Pad and Lolly
The new dimension in debridement.
A globally recognised method of mechanical debridement that is fast, easy and virtually painless

Debrisoft® Pad
For shallow wounds and accessible areas of skin

Debrisoft® Lolly
For hard-to-reach areas e.g. cavity wounds, between digits and skin folds

Visible results quickly
Debrisoft® saves time and therefore money
Cleanse the wound in
2 – 4 minutes

Easy to use
Debrisoft® is perceived as easy to use by healthcare professionals

Virtually painless during debridement
Patients perceived low debridement pain during the procedure with Debrisoft®

Experience Debrisoft® for yourself.

Debrisoft® Monofilament fibre pad

**Wound bed preparation – fast, easy, virtually painless.**

Debrisoft is intended for rapid and effective debridement of wounds. Debrisoft removes bacteria, dead tissue and exudate during debridement.

**Monofilament fibre pad**

Debrisoft is an easy, effective and virtually painless method of debridement that produces rapidly visible results which speak for themselves.

What makes Debrisoft unique:

- Angled fibre tips for highly efficient results
- Denser, softer fibre composite with 18 million fibres for gentle application
- Sewn edge and a reinforced reverse side make Debrisoft easy to use

**How to use:**

- Moisten the soft, fleecy side of the Debrisoft pad with 20-40 mL of tap water or saline solution, as per protocol.
- Lightly shake off any excess water, do not squeeze moisture out.
- With gentle pressure, using long sweeping strokes on the skin – or a circular motion on a wound – cleanse the area with the soft, fleecy side of the moistened Debrisoft pad.
- Refer to the IFU for full instructions & precautions

---

**Debrisoft Lolly**

For the debridement of hard to reach areas and wound sites.

The Debrisoft Lolly has been developed for the debridement of deep wounds, including those resulting from invasive surgery. This innovative product from L&R is very easy to use and now enables effective debridement, even in hard-to-reach areas.

Featuring the proven Debrisoft technology and a thick, soft fibre composite of millions of specially angled high-tech fibres, the Debrisoft Lolly is designed for fast, easy and virtually painless debridement. The single-use monofilament fibre stick impresses with its ease of use and is an innovative aid for use with your patients.

**How to use:**

- Moisten the soft, fleecy head of the Debrisoft Lolly with 5-15 mL (~1-3 tsp) of tap water or saline solution, as per protocol.
- Lightly shake off any excess water, do not squeeze moisture out.
- Clean the wound and/or skin by applying gentle pressure with the soft head of the moistened Debrisoft Lolly.
- Refer to the IFU for full instructions & precautions

---

Prontosan

Only a clean wound can heal. Experience the Prontosan® Effect.

Contains two main working ingredients:
- Betaine (Surfactant): A gentle wound surfactant that penetrates and cleanses contaminants from the wound.
- Polyhexanide (PHMB): A preservative, also known for its antimicrobial properties to reduce bacteria.

The Role of Wound Cleansing in Wound Bed Preparation

One of the most important principles of proper wound bed preparation is certainly wound cleansing, as only a clean wound can heal rapidly and without complications.

Avital tissue such as necrosis and fibrin coating, detritus and a high bacterial load can considerably affect wound healing, resulting in stagnation of the wound healing process.

It must be remembered that the treatment of a chronic wound can take several months, and therefore highly effective, gentle and patient-friendly wound cleansing is of great significance. Particular attention should therefore be given to the choice of wound cleansing agent.

Prontosan® especially designed for:
- Chronic wounds
- Post-radiation wounds
- Acute wounds

Prontosan Wound Irrigation Solution

40ml Ampoule BN400412 Box/30 $121.84*
350ml Bottle BN400403 Each $22.31*

Lasts up to 8 weeks once opened.
(Excluding single use 40ml solution)

Prontosan Wound Gel

After Prontosan® soak and rinse (see above), you can apply Prontosan® Wound Gel to the wound for further debridement and prolonged cleansing for up to 3 days.

The gel for acute, chronic and burn wounds.
- Reduces healing time
- Removes and prevents biofilm
- Prevents infections
- Facilitates painless dressing changes
- Is compatible with commonly used wound dressings

30ml Bottle BN400510 Each $23.36*
Duoderm CGF

DuodERM® CGF™ Dressing is a hydrocolloid, moisture-retentive wound dressing used for partial and full-thickness wounds with exudate. It incorporates a unique ConvaTec hydrocolloid formulation that distinguishes it from other hydrocolloid dressings.

Indicated for:
- Chronic wounds - pressure ulcers (Stage I-IV), leg ulcers.
- Acute wounds - traumatic wounds (minor abrasions, lacerations) partial thickness burns and donor sites

DuoDERM Signal® Dressing

DuoDERM Signal Dressing is an adhesive, tapered edge, modern hydrocolloid wound dressing with a change indicator.

For moderately exuding partial or full thickness wounds. The indicator helps to determine when to change the dressing which is designed to reduce premature dressing changes that can disturb healing and cause discomfort.

Comfeel Plus Transparent

Comfeel Plus Transparent is a thin and flexible hydrocolloid dressing

It can be used for treatment of no-to-low exuding chronic wounds and superficial acute wounds in the final stages of wound healing. Comfeel Plus Transparent may be used for superficial burns, superficial partial-thickness burns, donor sites, post-operative wounds and skin abrasions. The dressing can stay on the wound for up to 7 days depending on the specific wound characteristics.

Comfeel Plus Transparent hydrocolloid dressing is the thin and flexible solution for sealing and healing no-to-low exuding wounds.

**Cutinova Hydro**

Hydro-selective Wound Dressing

Cutinova Hydro is a unique, hydro-selective dressing. Its special structure offers a unique mode of action, absorbing water from wound fluid, but leaving essential wound healing agents behind in the wound.

Cutinova Hydro therefore combines all the proven benefits of clean, moist wound healing with the ability to leave growth factors, essential agents in wound healing and other natural proteins on the wound bed.

- Waterproof and bacteria proof
- Water vapour permeable
- Highly absorbent, even under compression
- The benefits of hydrocolloids without the drawbacks

**Algisite M**

Calcium Alginate Dressing

Algisite M is a calcium-alginate dressing which forms a soft, integral gel when it comes into contact with wound exudate. Excess wound exudate is absorbed in this process. Algisite M utilises the proven benefits of moist wound healing, which results in faster healing of even difficult wounds.

**Durafiber AG**

Absorbent gelling fibre dressing, with silver

DURAFIBER AG is an absorbent, non-woven, silver containing antimicrobial dressing composed of cellulose ethyl sulphonate fibres. The ionic silver in the dressing provides antimicrobial activity against a broad spectrum of common wound pathogens which may help to reduce bacterial bioburden and the risk of infection.

DURAFIBER AG is designed to rapidly form a clear cool gel on contact with wound fluid. This gel absorbs excess fluid, locks exudate away from the wound, provides a moist environment to support autolytic debridement and conforms intimately to the wound bed.

The high integral wet strength of DURAFIBER AG facilitates easy one-piece removal from moist wound beds and cavity wounds so minimising trauma to the wound and pain to the patient on removal.

Indications: As an absorbent dressing, gelling dressing for the management of chronic and acute, full thickness, partial thickness, or shallow granulating exuding wounds

**Durafiber**

Highly absorbent non woven, gelling fibre dressing

DURAFLY® is a highly absorbent, non woven gelling fibre filler dressing. Composed of a unique blend of cellulose based fibres, DURAFLY provides a versatile solution for the management of medium to heavily exuding chronic and acute full thickness, partial thickness or shallow granulating wounds.

- Forms a soft cohesive gel sheet on contact with wound fluid
- Locks in fluid and bacteria
- Controlled lateral wicking
- Lasting integrity and gelled strength
- Highly absorbent
- Minimal dressing shrinkage

Indications: As an absorbent dressing, gelling dressing for the management of chronic and acute, full thickness, partial thickness, or shallow granulating exuding wounds

**Aquacel Extra**

Hydrofiber Dressing with Strengthening Fibres

The unique gelling action of Hydrofiber® fibres convert to a soft gel when in contact with wound exudate. It absorbs and locks in the exudate, preventing spreading.

Aquacel Extra provides added strength and absorption compared to AQUACEL, for when greater efficiencies are desired.

### Healband Foam Dressings

These foam dressings feature a micro-thin skin contact layer (20microns) which won’t stick to wounds and aids in moving exudate away from the skin. Its highly absorbent hydrocellular foam layer is suitable for medium to high exudate. The waterproof, breathable top layer allows the wound to “breathe” yet provides protection to the wound from outside contaminants.

### 3M™ Tegaderm™ High Performance Foam Non Adhesive Dressing

High Performance Foam Non-Adhesive Dressing

Highly absorbent, breathable, non-adherent wound dressing. Indicated for use as a primary or secondary dressing for low to highly exuding partial and full thickness wounds such as pressure ulcers, venous leg ulcers, neuropathic ulcers, arterial ulcers, skin tears, surgical wounds, abrasions, superficial partial thickness burns and donor sites. The dressing maintains a moist wound environment, which has been shown to enhance wound healing.

Aquacel Foam
The only FOAM that has it all - comfort, simplicity and the healing benefits of an AQUACEL contact layer

- Protective Water Proof/Bacteria Barrier provides evaporation of excess moisture; allows patient to shower and bathe
- Soft Absorbent FOAM pad enhances patient comfort and absorbs excess fluid
- AQUACEL contact layer gels on contact with wound exudate to maintain a moist environment
- Gentle silicone adhesive designed to adhere to surrounding skin, not to the wound bed

Biatain®
Conformable Polyurethane Foam Dressing

- Soft and conformable polyurethane foam dressing that effectively absorbs and retains wound exudate
- Ensuring a moisture balance that is optimal for healing of exuding wounds
- When in contact with exudate the unique 3D foam structure of Biatain conforms closely to the wound bed even under compression
- Superior absorption and retention of exudate minimises risk of maceration and leakage
- Can be worn up to 7 days

Biatain Non-Adhesive

- Superior absorption for wounds with extra fragile skin

### Mepilex®

Mepilex is a foam dressing suitable for a wide range of wounds like venous leg ulcers or diabetic ulcers.
- Minimises pain and trauma at dressing changes using Safetac® technology
- Minimises the risk of maceration
- Can be cut to fit making it ideal for difficult to dress areas
- Soft and conformable
- Requires secondary fixation such as Tubifast

### Mepilex® Lite

Mepilex® Lite is a thin foam dressing for low-exuding acute and chronic wounds.
- Minimises pain and trauma at dressing changes using Safetac® technology
- Minimises the risk of maceration
- Very soft and conformable – suitable for areas requiring protection of compromised and /or fragile skin
- Clinically proven to significantly reduce the severity of skin reactions from radiotherapy treatment
- Requires secondary fixation such as Tubifast

### Mepilex® XT

Mepilex XT’s low and high viscosity fluid-management properties can be used at any exuding wound-healing stage
- Exudate channels designed to handle both low to high viscosity fluid
- Minimises pain and trauma at dressing changes using Safetac® technology
- Handles more fluid than other foam dressings
- Absorbs fluid faster than other foam dressings
- Effective on all exuding wound healing stages
- Requires fewer dressing changes compared to other foam dressings

Mepilex® Border

Mepilex® Border is an all-in-one foam dressing proven to minimise patient pain and trauma to the wound and surrounding skin1,2
- Minimises pain and trauma at dressing changes using Safetac® technology1
- Offers a combination of excellent fluid-handling capacity and retention for effective exudate management with less risk of maceration
- All-in-one dressing for chronic wounds, such as venous leg ulcers and pressure injuries
- Shower-proof – with a film backing providing a barrier to virus and bacteria (of size >25nm)

| Size   | Code     | Box/5 | | | |

Good things happen when you put people first

The ALLEVYN® Range

**ALLEVYN LIFE**
The next generation in multifoam layer dressing, designed with the human body in mind.

**ALLEVYN Non-Adhesive**
A versatile dressing for compromised skin.

**ALLEVYN Gentle Border**
A gentle silicone adhesive for fragile skin.

**ALLEVYN Adhesive**
A secure adhesive when security is paramount. The non-sensitising adhesive helps keep the dressing securely in place without adhering to the wound.

We find that good things happen when you put people first: improved wellbeing, greater concordance and all the system efficiencies that derive from that.

Getting you closer to zero delays in wound healing

Exudate management - Advanced Foam dressings

The ALLEVYN range of dressings from Smith & Nephew is a comprehensive range of absorbent foam dressings. Trusted with over 25 years of clinical use, the ALLEVYN Range has a history of innovation and putting people first, with a true understanding of the human body and the experience of living with a wound.

Allevyn Classic

Allevyn Non-Adhesive

The polyurethane wound contact layer prevents sticking to a full range of wound types; especially suitable for fragile skin

- Fast fluid absorption and superior breathability
- Non adhesive wound contact layer
- Waterproof outer film layer
- Sealed and shaped edges reduce leakage
- Full range of sizes

Allevyn Adhesive

- Dynamic breathable top film
- Faster fluid removal and increased breathability
- Optimises a moist wound environment: faster healing of the wound
- Reduced risk of maceration
- Comfortable, convenient and cost effective
- Dressing for moderate to highly exuding wounds for up to seven days

Indications: Venous, arterial and diabetic foot ulcers, pressure ulcers and chronic wounds.

Different for a reason
Intelligent exudate lock-in

Designed to lock in exudate and to minimise the risk of skin damage.1

- High fluid handling – absorbs under pressure across a range of viscosities. Absorbs vertically.1-4
- Hyper-absorbent fluid lock-in design – locks away exudate.
- Minimises risk of maceration.5-8
- Unique five layer conformable shape with low tack silicone – cuttable, easy to apply and remove.1-4

Allevyn LIFE

ALLEVYN Life dressing is a multi-layered design incorporating hydrocellular foam, hyper-absorber lock away core and masking layer which has been designed for people and their everyday life through:

- Unique quadrilobe shape with a wide border designed to fit the contours of the human body
- Allows patients to shower
- Protective masking layer minimises the visual impact of strikethrough
- Excellent fluid locking under pressure
- Provides the patient with peace of mind leakage prevention
- The multi-layered design provides cushioning and helps to spread pressure
- Silicone wound contact layer offers minimal pain and discomfort on removal
- Change indicator optimises dressing change frequency

**Designed for people. Designed for life**

Allevyn LIFE Non-Bordered

ALLEVYN LIFE Non-Bordered is a silicone gel adhesive dressing that provides the optimal moist wound healing environment to promote the healing of moderately and highly exuding wounds. The absorbent pad comprises a foam layer and a lock away core made from superabsorbent material.

The silicone adhesive layer is gentle, even to fragile skin and makes it easy to apply, reposition and remove. A breathable opaque outer film helps mask the exudate, prevent bacterial contamination and is showerproof when used with appropriate secondary retention.
## Allevyn Gentle

Allevyn Gentle dressing has an advanced triple-layer construction which combines an absorbent hydrocellular pad sandwiched between a perforated Soft Gel wound contact layer and a highly permeable waterproof outer film.

- Extra care for fragile skin
- Soft gel ensures minimal pain upon removal
- Can be left in place for up to 7 days
- Use under retention or compression bandages

### Indications:
For use on frail skin and wounds with moderate to high levels of exudate, such as skin tears.

### Allevyn Gentle Border

- Silicone gel adhesive ensures minimal pain upon removal
- Secures dressing in place for up to 7 days depending on amount of exudate

### Allevyn Gentle Border Multisite

**Tri-Lobe Shaped Hydrocellular Foam Dressing**

The unique tri-lobe design is ideal for use on awkward body areas such as the knee and elbow. Easy to apply and remove; can be repositioned easily without losing its adherent properties.

**Indications:** Low to moderate exuding wounds

### Allevyn Gentle Border Lite Multisite

A unique tri-lobe dressing indicated for low exuding wounds, ideally designed for dressing awkward areas of the body, it is a smaller dressing that is human shaped and conformable.

**Indications:** Low exuding wounds

### Meet our Team: Smilja

**Accounts and Purchasing - Sydney**

We’re not sure if it’s us (although we’re happy to take the credit) but Smilja is another artistic staff member. Smilja particularly likes doing charcoal portraits and our Sydney branch is full of willing subjects!

She works in our purchasing department. Chasing ETAs on supplier deliveries is one of her main tasks.

When she’s not working for us, Smilja enjoys art house movies and short films. She’s not so keen on the blockbusters, but she sure does paint a pretty picture!
Allevyn Thin
Adhesive Dressing for Moderately Exuding Wounds
Allevyn Thin is a highly conformable, semi-permeable, semi-translucent wound dressing.
- Maintains a moist wound environment
- Waterproof and bacteria proof
- Permeable to oxygen and water vapour

Indications: Low to moderate exuding wounds

Allevyn AG
Effective exudate management and effective antimicrobial action in one dressing
Allevyn AG is an absorbent antimicrobial three layer dressing consisting of:

- SSD (Silver Sulfadiazine) containing absorbent hydrocellular pad sandwiched between a perforated non adherent wound contact layer and a waterproof outer film.
- Highly effective
- Reduces bacterial load to eliminate barriers to healing
- Long lasting
- Sustained antimicrobial activity for up to 7 days
- Broad spectrum
- Reliable protection

All the benefits of ALLEVYN with added silver for when an antimicrobial is required
Biatain® AG Non-Adhesive
Conformable Polyurethane Foam Dressing

- Soft and conformable silver foam dressing that is proven to help infected wounds heal faster
- Effective on bacteria commonly found in infected non-healing wound
- Continuous anti-bacterial effect during entire wear time
- Due to the sustained silver release profile there is a continuous anti-bacterial effect during entire wear time (up to 7 days)
- Patented with a silver complex with broad anti-bacteria profile

Acticoat Flex
Antimicrobial Barrier Dressing

- Highly conformable and flexible
- Sustained (3 or 7 day) antimicrobial activity against a broad spectrum of wound pathogens including MRSA & Pseudomonas Aeruginosa.
- One way stretch improves patient mobility

Indications: For partial and full thickness wounds, pressure ulcers, venous leg ulcers, diabetic foot ulcers, burns and infected wounds, or wounds that may be susceptible to infection.

Silvercel™

SILVERCEL™ Hydro-Alginate is a sterile, non-woven pad composed of alginate, carboxymethylcellulose (CMC) and silver coated nylon fibres.

Due to the excellent fluid handling capacity and the prolonged antimicrobial activity SILVERCEL™ is an ideal dressing for the management of chronic wounds

Antimicrobial action

SILVERCEL provides a sustained release of silver ions for up to 7 days, allowing for an effective antimicrobial protection for the entire wear time, depending on the level of exudate.

SILVERCEL is effective against more than 150 wound pathogens, including MRSA, MRSE, VRE, Pseudomonas aeruginosa, Escherichia Coli, Streptococcus pyogenes, Klebsiella pneumoniae and Candida albicans

Absorbency

The unique composition of the dressing manages exudates in moderate to heavily exuding wounds, promoting a favourable environment for effective wound management.

SILVERCEL:

- Increases its tensile strength when in contact with wound exudate, allowing for intact removal
- Minimises the risk of maceration and leakage
- Has been proven to absorb and retain fluid even under compression

SILVERCEL and SILVERCEL NON-ADHERENT are indicated to help manage bacterial contamination and infection in moderate to highly exuding partial and full thickness wounds, including: Pressure ulcers, Leg ulcers (e.g. venous, arterial, mixed, PG), Diabetic foot ulcers, Donor sites, Traumatic wounds, Surgical wounds

Promogran® and Promogran Prisma®

Not a dressing, a Therapy

Excess protease activity (EPA) can be detrimental to wound healing. PROMOGRAN® and PROMOGRAN PRISMA™ maintain an optimal wound healing environment. This environment is conducive to granulation tissue formation, epithelisation and rapid wound healing due to the Collagen/ORC ingredient which has the ability to reduce wound surface area and modulate protease activity.

PROMOGRAN® is comprised of 45% oxidised regenerated cellulose (ORC) and 55% collagen in a sterile, freeze dried composite whilst PROMOGRAN PRISMA™ is comprised of 44% oxidised regenerated cellulose (ORC), 55% collagen and 1% silver-ORC in a sterile, freeze dried composite.

Negative Pressure Wound Therapy (NPWT) refers to the use of topical negative pressure to promote healing in acute and chronic wounds. The therapeutic benefits of NPWT include the reduction in bacterial load, an increase in blood flow to the wound and stimulation of granulation tissue formation.

PICO

Single Use Negative Pressure Wound Therapy System

PICO is a novel, canister-free, single-use system; offering the ultimate in portable, accessible and affordable NPWT. The PICO dressing manages fluid through a combination of absorption and transpiration. It is a four-layer dressing which allows effective fluid management without the need for a bulky canister. The pocket sized pump is battery powered, features an easy to use one button operation and is programmed to deliver ~80mmHg of continuous negative pressure for seven days.

Indications: Acute wounds, Chronic wounds, Flaps and grafts, Partial-thickness burns, Subacute and dehisced wounds, Surgically closed incision sites

Iodosorb
Cadexomer Iodine Medicated Dressing

IODOSORB dressings contain cadexomer iodine which can absorb up to 6 times their weight in fluid. When the iodine is released, it kills bacteria and changes colour.

- Reduces the bacterial count
- Absorbs fluids, removes exudate, pus and debris
- Promotes healing: maintains a moist wound environment
- Forms a gel over the wound surface
- Range of sizes to suit most wound sizes
- Proven to remove wound biofilms

Indications: Chronic, non-healing wounds including leg ulcers, pressure ulcers, diabetic foot ulcers and exuding, infected wounds (in conjunction with systemic antibiotics).

- Iodosorb dressing 6 x 4cm 5g
  - SN66051330
  - Box/5
  - $136.17
  - 3+ $126.12

  - SN66051240
  - Box/4
  - $141.86
  - 3+ $131.39

- Iodosorb powder 3g sachet
  - SN66051070
  - Box/7
  - $84.60
  - 3+ $78.36

Inadine
PVP-I Non-Adherent Dressing

Consists of a low adherent knitted viscose fabric impregnated with a polyethylene glycol (PEG) base containing 10% Povidone Iodine; equivalent to 1.0% available iodine.

Reliable, efficient and non-adherent dressing designed to manage bacterial contamination and prevent infection in both chronic and acute wounds. INADINE is indicated to manage ulcerative wounds and may also be used for the prevention of infection in minor burns and minor traumatic skin loss injuries.

Cica-Care
Silicone Gel Sheeting

Cica-Care is a soft, self-adhesive, silicone gel sheet for the treatment and prevention of scarring. It is clinically effective in flattening red and raised scars, both old and new, in 90% of cases. The Cica-Care adhesive gel sheet is soft, comfortable and simple to apply. It can be cut to size to fit most scars. Durable and reusable, it can be used day or night.

- 12 x 6cm
  - SN66250704
  - Each
  - $90.00
  - 2+ $83.35

- 12 x 15cm
  - SN66250706
  - Each
  - $165.81
  - 2+ $153.57

Mepiform
The effective self adherent dressing for scar reduction

Topical silicone has empirically been shown to have positive impact on hypertrophic scars and keloids. It may take from 3 months up to a year or more to improve an old scar, depending on the condition of the scar tissue. Mepiform shall optimally be worn 24 hours a day.

- Can be cut to size
- Minimises pain and trauma at dressing changes
- No extra fixation is needed
- Mepiform is thin, flexible and discreet
- Can be worn in daily activities
- Can be reapplied
- One Mepiform product can be used for several days

- 4 x 30cm
  - MOL293100
  - Box/5
  - $177.65
  - 3+ $160.67

- 5 x 7.5cm

Good things happen when you put people first

The ALLEVYN® Range

**ALLEVYN LIFE**
The next generation in multifoam layer dressing, designed with the human body in mind.

**ALLEVYN Non-Adhesive**
A versatile dressing for compromised skin.¹

**ALLEVYN Gentle Border**
A gentle silicone adhesive for fragile skin.

**ALLEVYN Adhesive**
A secure adhesive when security is paramount. The non-sensitising adhesive² helps keep the dressing securely in place without adhering to the wound.³,⁴

We find that good things happen when you put people first: improved wellbeing, greater concordance and all the system efficiencies that derive from that.⁵

Getting you closer to zero delays in wound healing

## Epaderm Ointment

Epaderm Ointment is a highly effective 3-in-1 emollient, skin cleanser and bath additive.

- Developed by Dermatologists in the UK
- Specifically for treatment of eczema and psoriasis
- Epaderm Ointment’s barrier aids moisture retention within the skin
- No fragrances or colourings
- Free of SLS (Sodium Lauryl Sulphate)
- Suitable for all ages, including babies
- Steroid free.

## Epaderm Cream

Epaderm Cream is a 2-in-1 emollient and skin cleanser manufactured from clinically proven ingredients.

- Perfect for less severely affected areas and daytime use
- Light, non-greasy formulation absorbs quickly and helps soothe the skin
- Contains glycerine for increased and longer lasting hydration
- No fragrances or colourings
- Free of SLS (Sodium Lauryl Sulphate)
- Suitable for all ages, including babies
- Steroid free.

## Secura No-Sting

Secura No-Sting Barrier Film

SECURA No-Sting Barrier Film is a liquid film-forming skin protectant that minimises stinging. With fast drying times of less than 30 seconds, it will create an effective waterproof barrier for up to 96 hours (4 days). It may be used to protect intact and damaged skin from irritation due to urinary or faecal incontinence, bodily fluids, adhesive trauma and friction.

3M™ Cavilon™ Durable Barrier Cream
For the prevention of skin breakdown and for moisturising intact skin

A concentrated, therapeutic cream that provides durable long lasting protection from bodily fluids whilst moisturising skin. The unique formula requires less frequent application and less product with each application.

Durable Barrier Cream 28g
3M3391  Tube  $7.63*

Durable Barrier Cream 92g
3M3392  Tube  $25.75*

3M™ Cavilon™ No Sting Barrier Film
For the intervention against broken or damaged skin

An alcohol free liquid barrier film that protects intact or damaged skin from bodily fluids, adhesive trauma, friction and incontinence. When applied to the skin, the alcohol free solvent evaporates off and the unique polymer is left on the skin; it then quickly dries to a non-sticky, protective, breathable waterproof coating.

Meet our Team: Isabella & Francis
Warehouse - Sydney

Almost halfway through a Bachelor of Human Sciences in Occupational Therapy, Isabella enjoys the overlap between her studies and her part-time job in our Sydney warehouse. She works as a ‘floater’ during semester breaks – multi-tasking and filling in when and as needed.

Like many at Team, (including her younger brother Francis who also works in the warehouse), Isabella is keeping it in the family in that her Dad is a Chiropractor and both service provider and customer to Team Medical Supplies.
