

The Lighted Ear Curette™ with Magnification

Bionix Lighted Ear Curettes combine illumination and magnification to help healthcare providers take less time to see and safely remove cerumen from the ear canal.

► PROBLEM:

Ear curettage requires three hands. One hand to brace the patients head and straighten the ear canal, one to maneuver the curette and one to position a light to avoid blindly digging in the ear.

► SOLUTION:

The Lighted Ear Curette™ with Magnification brilliantly illuminates the ear canal eliminating the practice of blindly curetting the sensitive area.

► RESULTS:

Complete visualization shortens procedure time and increases efficacy.

POTENTIAL REIMBURSEMENT (U.S. ONLY)

CPT Code / Description

69210 - For potential reimbursement of impacted cerumen.

©2016 Bionix Development Corp. *US Patent #D524939.

“

Bionix Lighted Ear Curettes have really changed our practice. We can quickly and painlessly clean out ears. We love them!

- Nancy Van Keuls, M.D. Westlake, OH
