

BD Insyte™ Autoguard™ BC Pro

Shielded IV Cannula with Blood Control Technology

Confidence. Control. Comfort.

BD Insyte™ Autoguard™ BC Pro

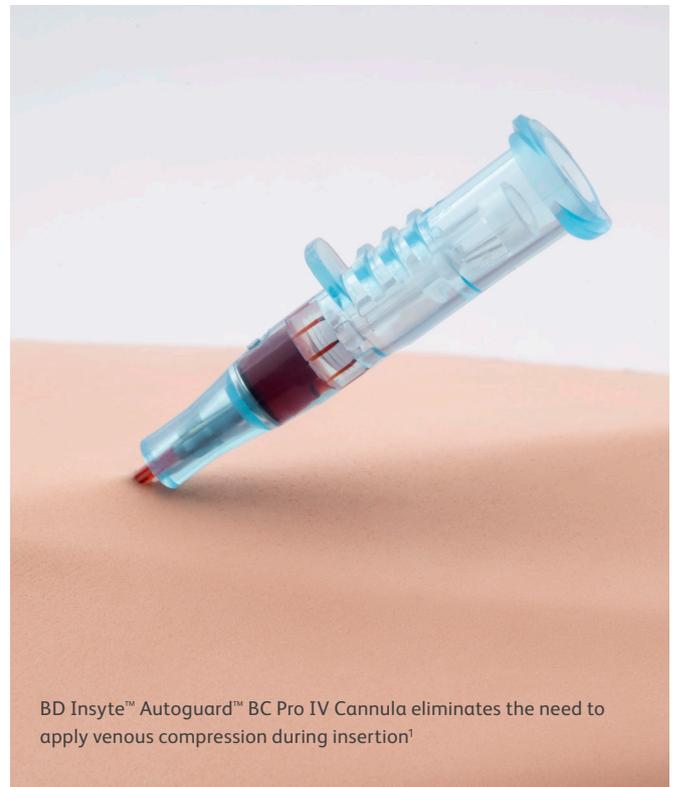

Shielded IV Cannula with Blood Control Technology

Confidently keep blood in its place—away from you and your patients

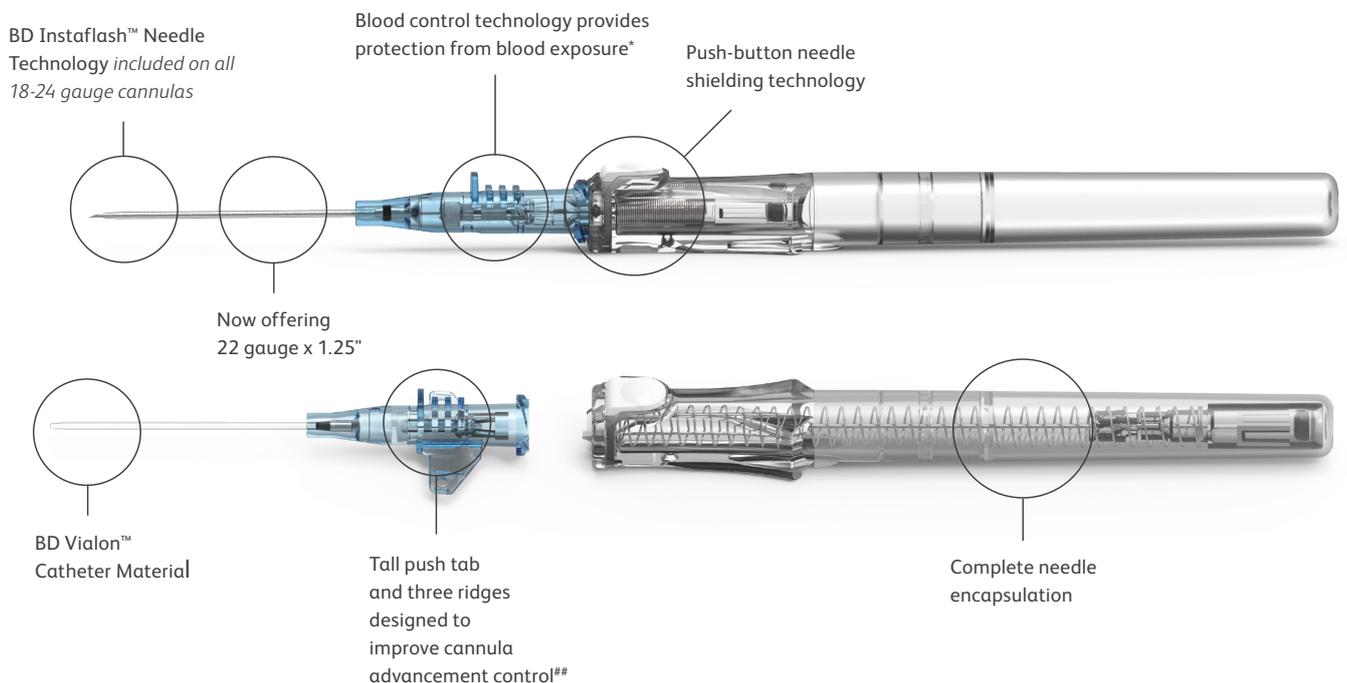

Anytime you access a vein, you are at risk of a needlestick injury and blood exposure. When you have to apply pressure after removing the needle and making the initial connection, the risk of blood exposure increases. Your worries can be minimised with the BD Insyte™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology.

The BD Insyte™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology takes safety to a new level:

- No need to apply venous compression during insertion¹
- Reduce healthcare worker risk from potential blood exposure and cost associated with clean-up^{*2}
- Needlestick injury protection
- Less blood leakage may mean less disruption to patient care[#]

The mechanics of confidence, control and comfort

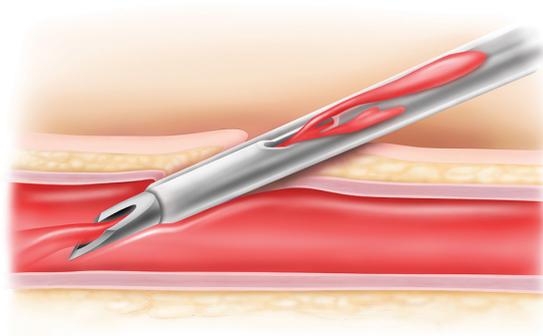

Be in control

First-insertion success is the goal. BD Insyte™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology is designed to provide improved control with a tall push tab and three ridges for successful placement and advancement of the cannula the first time^{##}.

BD Instaflash™ Needle Technology (included on all 18-24 gauge cannulas) is designed to confirm immediate vessel entry at the point of insertion and improve first-stick success, reducing painful hit-and-miss insertions.**

BD Instaflash™ Needle Technology

Patient comfort as a priority

The BD Insyte™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology is constructed using BD Vialon™ Cannula Material which softens up to 70% in the vein, enabling longer dwell times and reducing the chance of mechanical phlebitis by up to 50%.^{†3}

Every patient is unique. Each has different needs requiring different therapies. The BD Insyte™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology offers a full range of sizes to meet those needs.

98%

In a healthy human study, 98% of clinicians indicated they felt no risk of blood exposure during insertion when using a cannula with the same blood control technology as BD Insyte™ Autoguard™ Pro BC IV Cannulas.^{‡1}

Long length 22 gauge

The BD Insite™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology includes a 22 gauge x 1.25" option and BD Instaflash™ Needle Technology *included on all 18-24 gauge cannulas*. Having a full range of sizes and lengths gives you more options when it comes to choosing the appropriate cannula to accommodate the prescribed therapy and patient need.

BD Insite™ Autoguard™ BC Pro Shielded IV Cannula with Blood Control Technology
