

Biodegradable Injection Tray

Environmental Advantages:

- * Cut down or eliminate the usage on petrol based plastic
- * Reduce pollution and emission of Co2 and other toxins

Quality Advantages:

- * TGA listed and comply with all industrial standard
- * Medical grade with durable and robust design
- * Clean and tidy finish for pleasant nurse and patient experience

Financial Advantages:

- * Product cost less than plastic and give direct savings
- * No extra capital cost for waste processing machine
- * No running cost to process re-usable hollowware

Improving Public Health:

- * Single Use to reduce the possibility of cross infection
- * Reduce the health risk caused by the plastic

Did you know ...

In Australia and New Zealand we use more than 10 million medical hollowware every year ?

250 tons
of plastic a year

Converting
all plastic to
biodegradable
ones would save

1500 tons
of CO2 emissions a year
