

DISPOSABLE CURTAIN SELECTION GUIDE

Haines®
MEDICAL AUSTRALIA

Use this guide to help you choose the right Haines® Disposable Curtains

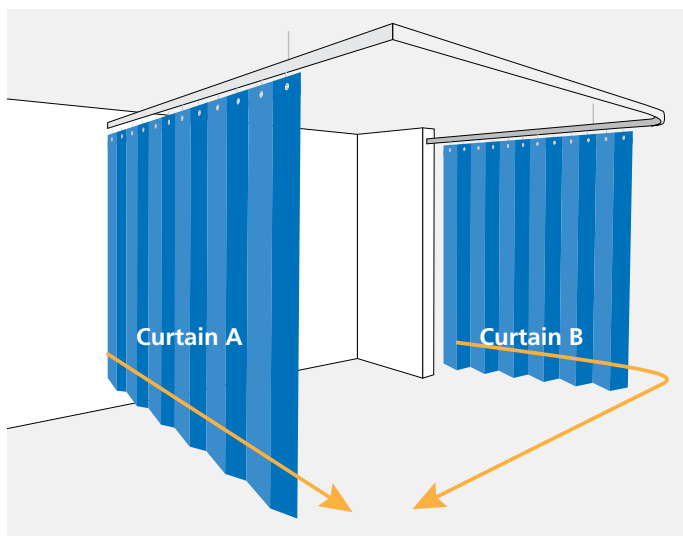

Supplied by:

team medical supplies

1 CURTAIN LENGTH

Measure lengths of curtains required

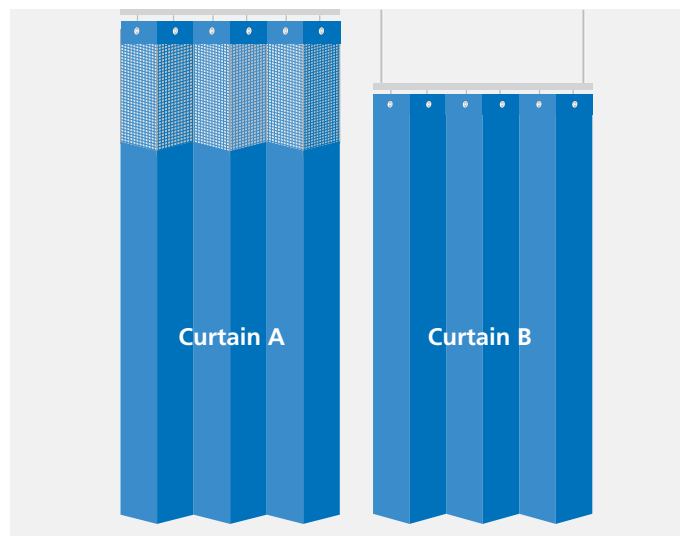

Curtain A: 4.5m length for short sections dividing cubicles

Curtain B: 7.5m length for long sections i.e. curved track at front of cubicle (2.5m length also available for small cubicles, privacy curtains, across windows - fits sizes 0.5m to 1.8m width areas)

2 CURTAIN DROP

Check the curtain drop required:

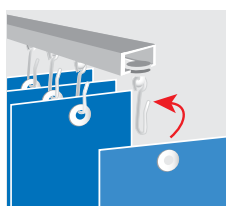

Curtain A: Track fixed to ceiling may require curtains with 50cm mesh top section to allow for sprinkler system. These curtains have a 2.3m drop.

Curtain B: Track suspended from ceiling does not require curtains with mesh top section. These curtains have a 2.0m drop.

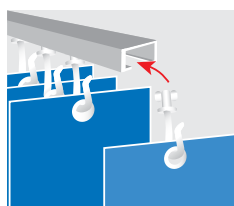

3 HOOKS

If using existing hooks, check they slide easily around the track. If replacement hooks are required, Haines® Roller Hooks are an easy sliding option.

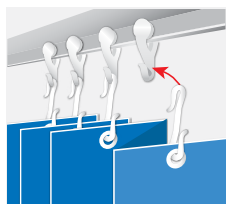

Existing Hooks

When using existing curtain hooks, hook the Disposable Curtain eyelet onto your curtain hook

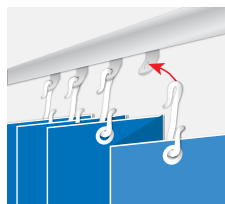

Roller Hooks

For curtains that are difficult to slide along the track, use Haines® Roller Hooks for easy sliding.

"S" Type Hooks

Used to connect Disposable Curtains to existing curtain hooks. Ideal for window applications.

4 COLOUR

Choose your colour:

Summer Blue

Latte

Cream

Ideal for hospital recovery areas

5 QUANTITY

Calculate the number of curtains and hooks required for your area/department/ward.

Width	Box Quantity	Packets of hooks required per box
2.5 metres	15	6
4.5 metres	8	5
7.5 metres	5	5
