MADE IN GERMANY

LED HQ

LED NOW IN HEINE QUALITY.

HEINE EL3 LED Examination Light
Simply bright LED Illumination

'Quality' has become one of most overused and misused terms today in an effort to sell products. Few companies, however, are able to tangibly define their products quality in terms of end-user benefits and value. At HEINE we clearly define the benefits of HEINE Quality in terms of Performance, Function and Durability:

PERFORMANCE

Simply Bright. The EL3 LED provides bright, shadow-free illumination precisely at the point of interest.

There's LED. And there's LED^{HQ}. HEINE has set a new standard which maintains that only the best is good enough, from the selection of materials to processing, from light intensity to dimmability, and from thermal management to a colour rendering index as high as possible. **That's what we call LED in HEINE Quality – or LED^{HQ}.**

Shadow-Free Illumination. The compact illumination head (Ø approx. 60mm) allows convenient, precise positioning, particularly in difficult application situations. Optimal positioning eliminates unwanted shadows in the illuminated field.

FUNCTION

Maintenance-free and easy to clean. Cool-Touch closed head design makes disinfection safe and easy.

Optimal positioning. The light weight head and stable goose neck allow easy and intuitive adjustment and keep the light exactly in the required position.

Various mounting options. Wall mounting, clamp for table-top mounting or on a wheeled stand.

DURABILITY

5 Year Guarantee. HEINE makes no compromises in manufacturing high quality medical instruments. Our commitment to vertical integration in manufacturing means we control all aspects of our instrument quality.

LED Thermal Management. LED illumination systems require thermal management to ensure long-term performance and product stability. Carefully selected and applied heat-diffusing materials in the EL3 LED examination light guarantee consistent quality and performance throughout the LED's lifetime.
