

CONVENIENT HAND HYGIENE FOR PATIENTS

HALYARD* Neutral Hand Wipes

TRUSTED PROTECTION

FOR SURFACES & PATIENTS

SO YOU CAN CARE WITH CONFIDENCE

At any given time, more than 1.4 million people around the world are suffering from complications of Healthcare Associated Infections (HAIs)¹. The good news is that compliance to good hand hygiene contributes to a reduction in HAIs². Help prevent against HAIs by empowering patients to take care of themselves during their hospital stay and encouraging good hand hygiene practices no matter their level of mobility.

Good hand hygiene practices may be compromised by patient mobility. In these cases where access to soap and water is limited, healthcare workers and patients often turn to alcohol-based products to reduce the incidence of germs on their hands. Alcohol is very effective in killing micro-organisms on the hands, however it is inactivated by organic matter and therefore not recommended as a cleaning agent³. Visibly soiled hands must be washed.

OUR SOLUTION IS HALYARD* NEUTRAL HAND WIPES

HALYARD* Neutral Hand Wipes are alcohol-free wipes that contain neutral ingredients to clean visibly soiled hands and Vitamin E to restore moisture to the skin. Available in a convenient and portable soft pack, HALYARD* Neutral Hand Wipes are the ideal choice for limited mobility patients and their visitors.

APPLICATIONS

- Before or after meals
- After using the bathroom
- Before and after contact with patients
- After contact with potentially contaminated equipment or surfaces
- For low mobility patients

DEPARTMENTS

- Wards
- Accident & Emergency
- Palliative Care
- Oncology
