

DERMENGINE™

The World's Most Advanced Skin Analytics System

Bringing digital healthcare and mobile technologies together
Providing tools for regular skin screening and the early detection of skin cancer

CONNECTED PLATFORMS

This comprehensive mobile medical imaging suite provides high-quality dermoscopy, precise and efficient documentation and a seamless, secure communication solution for your busy clinical workflow. The complete dermatology solution comes with secure cross-platform access on your smartphone, tablet, laptop, desktop, and TV anytime, anywhere.

EXPERIENCE THE DIFFERENCE

Let DermEngine's Visual Search feature revolutionise how you analyse dermoscopic images.

This smart technology enhances your practice, increases efficiency and is an educational resource with the power to transform your work.

Access one of the largest image databases and understand why professionals stand by DermEngine.

Advanced dermoscopy has never been easier!
Simple and affordable.
Try it today.

Now available in Australia

WHY DERMENGINE

Smart

The system's powerful features run award-winning algorithms designed for dermatology. Take your practice to the next level with the platform's cutting-edge technology. Seamless integration with Medical Director, Best Practice, Genie Solutions and more.

Simple

DermEngine is easy to use, and has no complicated setup or maintenance. Simply log in to access the intuitive analytics features, and communicate with your network online.

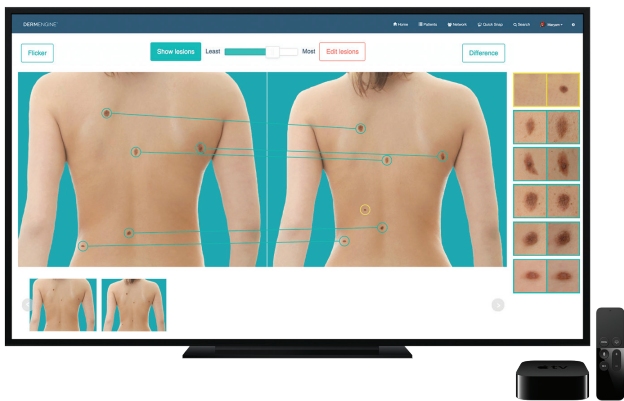

Accessible

The cross-platform system is available anytime, anywhere. DermEngine syncs seamlessly across iOS, Android, the web, Mac and Apple TV. Keep your practice at your fingertips even when you are on the go.

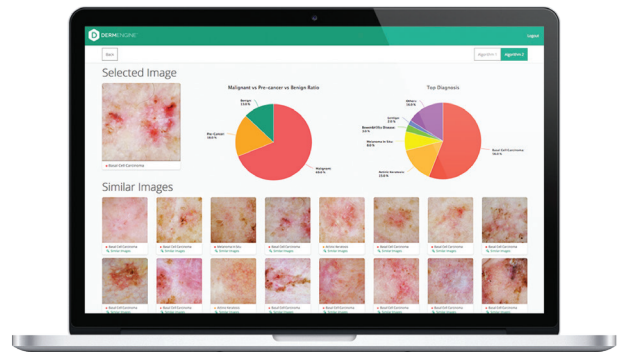

Affordable

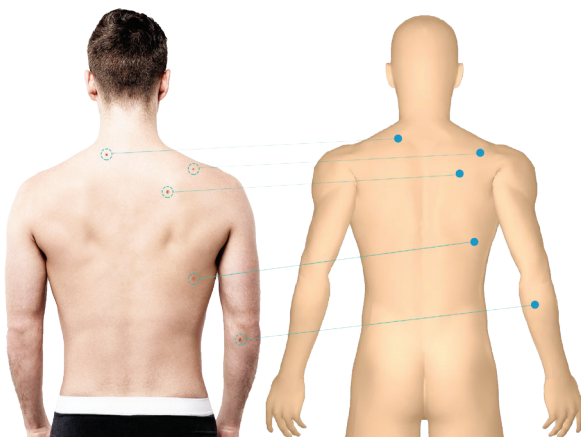

DermEngine's leading image analytics features come at an unbeatable price, fit for any size clinic or budget. Flexible pricing plans and customisable bundles will save your practice both time and money.

Full-Body Imaging

Visual Search

MoleMap

Compatible with all dermatoscopes including MoleScope.

ADVANCED DERMOSCOPY

DermEngine provides advanced features for smart dermoscopy

Advanced dermoscopy has never been easier!

- **Capture, document, diagnose; all in the space of a few minutes**

Its user-friendly interface makes DermEngine easily in reach of any GP practice

It is extremely simple to use and affordable which makes it a great commercial value-add for any practice

A great clinical addition to your practice and your patients

- **Clinical imaging & patients management**

Patient profile, clinical & dermoscopy skin/mole imaging, full-body imaging and diagnosis reports.

- **Seamless integration with the MoleScope device for mobile dermoscopy**

The new MoleScope™ II captures a superior image quality for medical professionals

- **Compatible with all leading dermatoscopes in the market**

If you already have a digital dermatoscope then all you need is DermEngine

- **Specialized tools for short-term dermoscopy and lesion monitoring**

Easily monitor your patients lesions over time. Ensuring repeat patient visits.

- **Advanced algorithms for image analytics**

- **Visual Search** (included in all price plans)

DermEngine's unique artificial intelligence-based content based image retrieval (CBIR) system finds and displays similar images from a database containing thousands of previously validated pathology-labelled images, when given a dermoscopy query image.

The Visual Search tool provides experts with a set of visually similar image to support the decision making process on suspicious cases

Visual Search is designed as a decision support tool for both experts and GPs, and can also be used as an educational tool.

Let DermEngine's Visual Search feature revolutionise how you analyse dermoscopic images.

- **Full-Body Imaging**

Full-Body Imaging (FBI) aids dermatologists in detecting early signs of skin cancer and is valuable in avoiding unnecessary biopsies.

DermEngine's app allows you to capture full-body images of your patients. It is the first web-based system for capturing and analysing full-body images by storing images of different body parts and evaluating new/changing lesions.

- **MoleMatch**

MoleMatch automatically detects and matches skin lesions from similar images taken at two (or more) different times. The matched lesions are sorted based on the amount of change in their size and color to help doctors find the lesions that have changed most.

- **Refer patients internally and externally**

Physicians within the system can refer cases to one another - GP - Dermatologist - Pathology lab.

Not sure about the lesion? Quickly refer to your own clinic specialist or an independent Dermatologist for a 2nd opinion.

Quick results and piece of mind for your patient.

- **Integration**

Seamless integration with Medical Director, Best Practice, Genie Solutions and more.

Use DermEngine's powerful imaging and analytics features without replacing your entire system.

- **Free Migration**

Simplified, assisted data migration to DermEngine platform from your existing imaging system.

(MoleMax, Fotofinder etc) A one-time, hassle-free transition, provided free of charge for eligible customers.

- **Safe and Secure**

DermEngine is a secure encrypted platform that provides encryption on mobile devices as well as on the servers. In addition to security, DermEngine has been designed with privacy in mind. Images, diagnoses and patient information are only available to the patient and his/her doctors, and no other doctor or user can access the patient data. Through a distributed server architecture of DermEngine, patient data for each region is stored in a server in the respective region. Currently, there are four data centers in Canada, US, Europe and Australia.

- **Affordable**

No upfront cost, no installation cost, no maintenance fee

Easy registration - 30 day free trial

FULL INTEGRATION & FREE MIGRATION

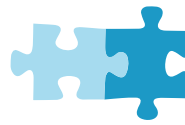

Safe & Secure

HIPAA-compliant with multi-region data centers.

Migration

Simplified, assisted data migration to DermEngine platform.

Integration

Seamless integration with existing EMR/EHR services to improve clinic workflow

Backups

Easy physical backups from DermEngine's secure cloud database

ADVANCED DERMOSCOPY HAS NEVER BEEN EASIER

Typical Workflow

- Capture
- Document/map
- Analyse
- Diagnose
- Treat/refer

All in the space of a few minutes

TELE-DERMATOLOGY & REFERRAL NETWORK

Build and customize your own referral network on the DermEngine platform.

DermEngine can securely connect you with your hospitals, GP colleagues, dermatologists and pathology labs so you can give your patients the care they need
