Medisafe Biomedical 98ULT

Why Choose us

Medisafe Plus is the original premium brand of vaccine fridge in Australia. It is designed and built in Australia and has been protecting vaccines and medical products since 2010.

Medisafe Biomedical storage units are purpose-built for use in hospitals and laboratories. The units are designed to ensure low noise and consistent temperature readings through a fridge and freezer range.

A Medisafe Biomedical storage unit is feature packed, resulting in a storage solution that gives you peace of mind – knowing your vaccine/drug/samples are stored in the safest possible manner.

Medisafe Biomedical can tailor our solution to end user needs to allow for additional probes or temperature recording systems through the manufacturing process.

Medisafe Plus cloud monitoring is optional on all Medisafe Biomedical units, with 12 months free access to the portal. The cloud monitoring acts as an automated data logger which allows you to view and print your temperature chart with Min and Max and data in real time on any web enabled smartphone, tablet, or computer from any location.

All units have a BMS system accessible in the back of the unit for hospital remote monitoring.

Medisafe
Biomedical 98ULT

Medisafe Biomedical 98ULT
