

Reliable Power Solutions for Healthcare

Portable Backup Power for Critical Equipment

When every second counts, power security shouldn't be a luxury — it should be guaranteed. Whether you're protecting **temperature-sensitive vaccines** during outages or ensuring that **essential systems in medical centres and pharmacies** remain online, the **Anker F3800 and F2600** deliver quiet, dependable, and portable backup power you can trust.

From keeping vaccines at the right temperature to supporting **Wi-Fi routers, computers, home-use medical devices, and key infrastructure**, Anker's advanced portable power stations are built to perform — no noise, no fuss, and no downtime.

Industry-Leading Reliability

5-Year Warranty & 10-Year Battery Lifespan — Designed for long-term peace of mind.

Portable & Flexible Design

Move them where needed — clinics, consulting rooms, vaccine storage areas.

Zero Installation Required

Plug-and-play simplicity. No hardwiring. No ongoing costs. 100% maintenance-free.

Smart Monitoring via App

Check power usage, battery status, and runtime from your smartphone via Wi-Fi or Bluetooth.

Reliable UPS Capability

Certified <20ms auto switch-over to backup power — seamless protection for your operations.

Ultra-Quiet Performance (45dB)

Operates silently — ideal for indoor or clinical settings without disruption.

Feature Spotlight & Technical Advantages

Anker F3800 & F2600 – Built for Critical Readiness

F3800 Portable Power Station

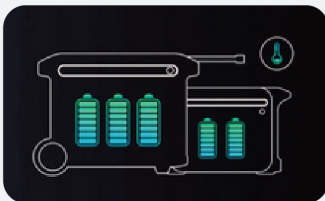

- 6000W**
3840Wh capacity / 6000W output (peak 9600W)
- 20ms**
UPS auto-switch <20ms
- Recharges to 80% in just 1.4 hours**
- Solar-ready for off-grid scenarios**
- 3M**
Includes standard 3M power lead
- 26.9 kWh**
Expandable up to 26.9kWh with additional batteries

F2600 Portable Power Station

- 2400W**
2560Wh capacity / 2400W output
- 20ms**
Same UPS functionality and fast charging
- Lightweight, compact, and ideal for smaller rooms or mobile clinics**
- Perfect for vaccine fridges and basic medical system backup**

Next-Generation Safety & Control

Anker ActiveShield™ 2.0

Smart temperature regulation to prevent overheating and extend battery lifespan.

Advanced Surge Protection

Keeps sensitive equipment safe from voltage spikes or fluctuations.

HyperFlash™ Charging

Recharge from 0–80% in just 1.4 hours via standard AC outlet.

Solar Panel Compatibility

Optional off-grid capability for extended runtime and outdoor setups.

Trusted by UPS Equip – The Power Specialists

Backed by over 40 years of collective industry experience, UPS Equip has delivered premium-grade, compliant power solutions across Australia's healthcare and emergency services. Our customers trust us to provide uninterrupted power when it matters most.

Let us help you build resilience into your operations — without the cost or complexity of fixed installations.
