Welch Allyn
KleenSpec Single Use LED Vaginal Specula

NOW AVAILABLE
In Four Convenient Sizes

LED Technology

> Provides continuous output for 30 minutes

> Emits crisp white light with no blue or yellow hues for true visualisation of tissue colour

> Produces uniform light output, with no hot spots, to help provide the visualisation needed for improved patient exams

> LED light source is sealed within handle to reduce patient risk and placement provides unobstructed view of exam area

> Smooth molded edges designed to provide maximum patient comfort

> 100% acrylic, as opposed to an acrylic-styrene mix, is 50% stronger minimising the chance of cracking or breaking

> Ready to use out of the package, simply pull switch when ready

> Look for colour-coded Welch Allyn handle colours

> Lithium-primary battery provides longer shelf life and withstands extreme temperature variations better than alkaline

> Option to remove lithium-primary battery and LED for disposal or recycling

> Designed for quality and durability from a trusted manufacturer and made in the U.S.A.
