

OPAL® Instrument Grade - High Level Disinfectant

ARTG No: 206575

OPAL® is an Ortho-Phthalaldehyde (OPA) based high level disinfectant that features a reuse period of up to twice the length of competitors.

OPAL® is suitable for manual disinfection of compatible semi critical medical and dental devices as well as automated reprocessing of endoscopes and accessories.

OPAL® has the same contact time and temperature requirements for Manual and Automated Reprocessing. Because OPAL® is a room temperature high level disinfectant at 20 °C, there is no heating of the product

necessary for any reprocessing of devices. The 6-minute contact time with OPAL® for both Manual and Automated Reprocessing means faster turnaround times, saving time and money.

Packsizes available:

Size	Code
6 x 1L	150106
2 x 5L	150103
