ZOLL®

MOVING CARE FORWARD

# THE GROUNDBREAKING NEW MONITOR/DEFIBRILLATOR FROM

# ZOLL

To improve patient outcomes, healthcare providers rely on feedback and data at every step of the rescue. Access to real-time clinical feedback on the scene can take your care to the next level and enable you to manage multiple disease states.

## Real-Time Clinical Feedback—Available Only Through ZOLL

For years, ZOLL® devices have provided real-time clinical feedback on CPR to help rescuers deliver high-quality compressions to patients in cardiac arrest. The X Series® Advanced monitor/defibrillator goes beyond cardiac arrest, providing real-time clinical feedback for patients in respiratory distress and patients with a traumatic brain injury:

**Real CPR Help®** – provides real-time clinical feedback on compression rate and depth

**Real BVM Help®** – provides real-time clinical feedback on ventilation volume and rate

**TBI Dashboard™** – provides the right information at the right time to help rescuers effectively manage traumatic brain injury (TBI) patients

# DISEASE STATE MANAGEMENT AND ACCESS TO KEY DATA

## Manage Multiple Disease States

In the pre-hospital environment, access to data helps you manage trauma, cardiac arrest, chest pain, respiratory distress, pediatric issues, and other conditions. X Series Advanced provides information and feedback on CPR, ventilation, and TBI, increasing the range of treatable patients when compared to other currently available monitor/defibrillators.

Standard Monitor/defibrillator

- Cardiac Arrest
- STEMI
- Other

X Series Advanced

- Cardiac Arrest
- STEMI
- Respiratory
- Trauma
- Other

### Seamless Device Integration

For cardiac arrest patients, the X Series Advanced features Real CPR Help and Real BVM Help, providing simultaneous real-time feedback on both CPR and ventilation quality. When used with the AutoPulse®, ZOLL's automated CPR device, the X Series Advanced captures the unique chest compression data and displays it on screen.

### Easy Access to Data

With RescueNet® CaseReview, clinicians can view data from the X Series Advanced post-case for effective QA/QI—no more chasing crews to get case files. With the push of a button, medics can send files directly to your secure system for performance-focused debriefing. Access to data, including ventilation and CPR performance, is as fast as opening a web browser.
