Measure your lung health on the go with a professional spirometer

Air Next, the first spirometer connected to a smartphone that measures your lung health in seconds, anytime, anywhere.

Quality

Air Next Spirometer is a CE certified Class IIA Medical Device.
Developed in accordance with quality standards.

Accuracy

Air Next is as accurate as a desktop spirometer. Share your results with one touch using the app.

Maintenance free

With the hygienic and high precision disposable turbine, there is no need for calibration.

Safety

Used by thousands of patients and physicians around the world with no adverse events.
