

Looking for a screening audiometer that saves you time?

The Entomed SA 202 performs automatic tests based on your input. It's a lightweight screening audiometer that will speed up your testing process with automatic tests based on your preferences saving you precious time.

SA202 – Screening Audiometer

A versatile stand-alone screening audiometer

SA 202 is a manual / automatic, true two-channel, pure-tone, air conduction screening audiometer with full frequency and output range. Its patented digital design and RoHS compatibility makes it well adapted to the modern, environmentally aware user. SA 202 is user friendly, robust, reliable and yet its light-weight design makes it ideal for frequent field use.

- Built-in talk forward microphone with volume control for convenient communication
- Internal memory - stores up to 50 complete audiograms in non-volatile memory
- Hard copy print-outs to any PCL 5 printer, via optional SA 07 printer interface cable
- Computer interface, via optional RS 232 computer cable
