i-gel® Supraglottic Airway

The first major development since the laryngeal mask airway, i-gel has changed the face of airway management and is now widely used in anaesthesia and resuscitation across the globe.

Made from a medical grade thermoplastic elastomer, i-gel has been designed to create a non-inflatable, anatomical seal of the pharyngeal, laryngeal and perilaryngeal structures whilst avoiding compression trauma.

- i-gel has a soft, gel-like, non-inflatable cuff, designed to provide an anatomical impression fit over the laryngeal inlet.
- The shape, softness and contours accurately mirror the perilaryngeal anatomy - an innovative concept meaning no cuff inflation is required.
- Working in harmony with the patient's anatomy, compression and displacement trauma are significantly reduced or eliminated.

Size 1	Neonate (2-5kg)	INT8201000

Spiracle BRAVO2 Oxygen Regulator

- Brass regulator with 11 variable flow rates from 0.25 to 25 LPM
- Safe and effective
- Made from quality crafted internal brass components
- Nickel plating on the regulator provides an attractive corrosion resistant finish
- Fits on all cylinders
- Meets Australian Standards

$389.85* FEROXRS833
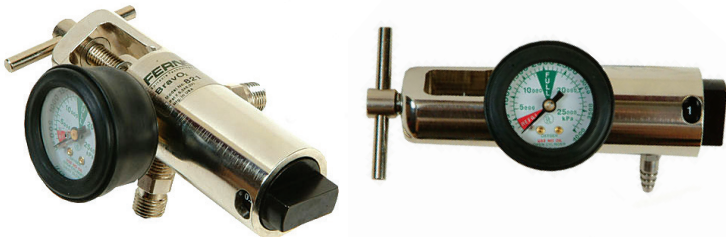

Piston Therapy Oxygen Regulator

The Piston Oxygen Therapy Regulator is a reliable oxygen therapy delivery device. It offers a Heavy Duty and compact design allowing it to be used in most therapy applications. Full Brass body make this regulator a durable and reliable solution to any environment where oxygen therapy is needed.

- Full brass body and internals
- Barb outlet
- 11 therapy flow settings (0.5, 1, 2, 3, 4, 5, 6, 8, 10, 12, 15, LPM)
- Weighs approximately 700g

$175.60 ADTME870

Oxygen therapy regulator

The Series-O regulator has been the industry leader in Australia for years. The simple but effective design and ease of use make this single stage regulator a very low maintenance yet high performing product that can be used in a variety of environments.

- Triple filter system increases the regulator performance by preventing foreign particles from getting in contact with the high pressure gas or the regulator seat
- No tools are required to routinely disconnect the regulator from the cylinder valve
- A safety relief valve is built in to the regulator to protect staff and patients in the event of high pressure failures
- Gas specific inlet fittings and outlet fittings to prevent connecting to the wrong gas type
- Pin indexed yoke inlet
- 400kPa max pressure outlet
- 20,000kPa @ 15°C max rated inlet pressure

ADT518804 $503.40*

Oxygen Therapy Kit with Resus Bag

Suitable for emergency resuscitation and oxygen therapy

1 x Oxygen therapy bag
1 x Oxygen therapy regulator
1 x Single use adult manual resuscitator set with 60cm H2O pop off
1 x CPR pocket mask
1 x Guedel airway kit
2 x Oxygen mask adult disposable with 7ft tube
2 x Oxygen mask child disposable with 7ft tube
2 x Nasal canula adult disposable
2 x Nasal canula child disposable

ADTOTK12026

$645.75*
(bag included)

Simpflow Oxygen Flowmeter 15LPM

- Provides an accuracy of +/-5% (of full scale reading) and is pressure compensated to ensure the flowmeter maintains its accuracy independent of varying gas supply
- Flow limited output orifice and fail safe shroud protects the patient from excessive flows in the event of excessive gas pressures
- Gas specific inlet fitting to prevent connection to wrong gas type
- Colour coded inlet fitting, outlet fitting and control knobs for quick recognition of gas used by the flowmeter
- The flowmeter design provides clear readability with large bold print lines and numbers providing 180° visibility

$**189***

ADTX01102OXT

Twin-O-Vac multi-purpose device

The Twin-O-Vac is a low cost versatile unit that is ideal when extra or portable sources of oxygen or suction are required. Each Twin-O-Vac uses one oxygen outlet (i.e. an oxygen pipeline wall point or cylinder regulator) to provide variable suction plus two separate sources of oxygen.

All three outlets can be used simultaneously on up to three different patients if necessary. The Twin-O-Vac can be connected or linked to an assortment of equipment including resuscitators and flowmeters.
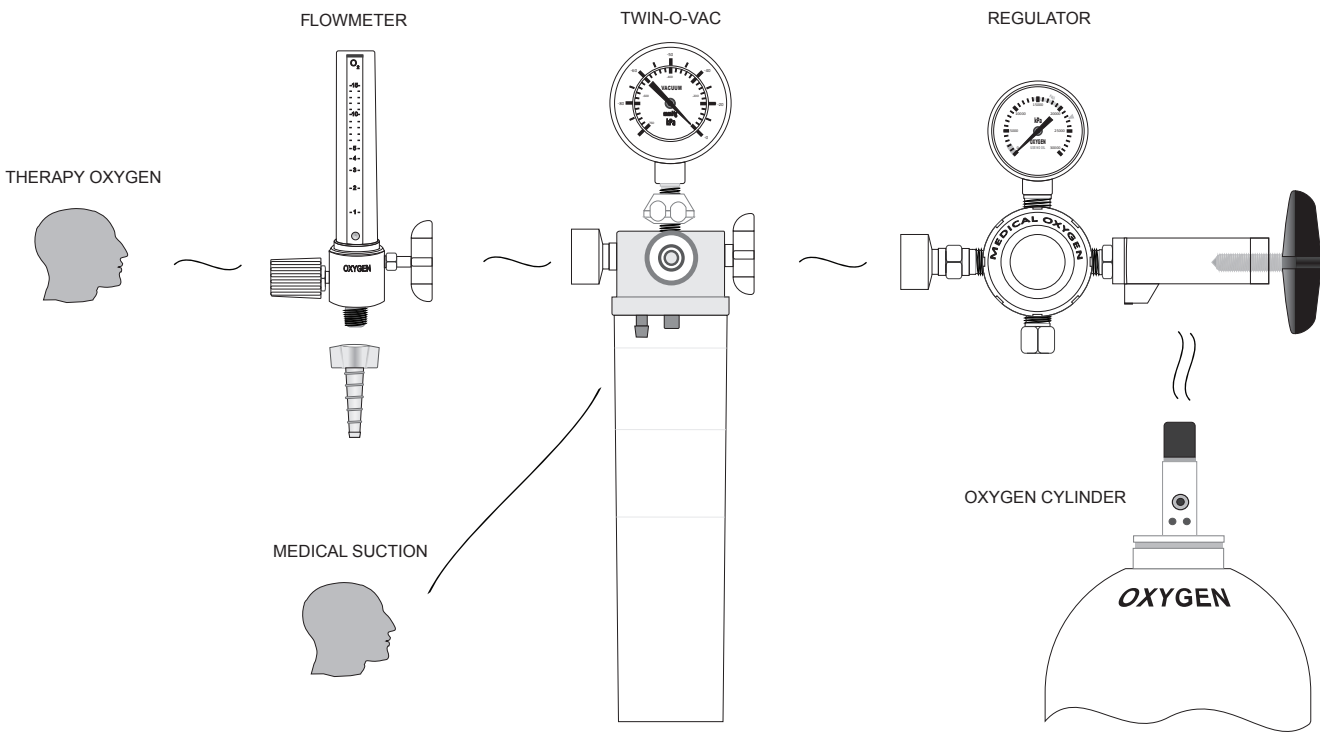

$**959.20***

Broselow™ Paediatric Emergency Tape

The Broselow Tape is recognised in most medical textbooks and publications as a standard for the emergency treatment of children.

The tape is calibrated for paediatric patients between 46cm and 146.5cm in length, which corresponds to a weight range of 3kg to 34kg. The tape is divided into nine colour zones with pre-calculated drug doses, fluid volumes, and equipment sizes for each zone.
