

LET WELCH ALLYN® CHANGE YOUR VIEW

Discover the Next Generation of
Welch Allyn® Physical Exam Tools

BIGGER, BRIGHTER VIEWS

Examining the structure of the eyes and ears is a fleeting yet critical part of the physical exam. That’s why we’ve listened to countless providers, and have redesigned our otoscopes and ophthalmoscopes for enhanced exams.

Take a closer look with our new
Welch Allyn® PanOptic®™ Plus
Ophthalmoscope and Welch Allyn®
MacroView™ Plus Otoscope with bright,
white LED technology.

Enabling health care professionals to make the earliest and most accurate diagnosis.

HEINE Diagnostics: Better illumination.
Higher colour fidelity. More magnification.

HEINE BETA® Series

The top-of-the-line full-size "BETA" Series offers the best performance, function and durability.

The BETA 400 LED F.O. Otoscope is the only otoscope with 4.2 magnification and LED Fibre Optic illumination.

The BETA 200 LED Ophthalmoscope is the only ophthalmoscope with an aspherical optical system and LED illumination.

The handles offer next-generation energy management and high-quality metal construction.

Heine's exclusive LED^{HQ} illumination offers virtually unlimited hours of working life (up to 100,000 hours). No need to ever replace bulbs. Maintenance-free for a lifetime.

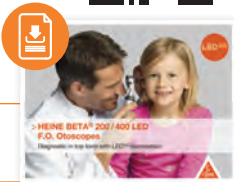

HEINE BETA® 400 LED F.O. Otoscope

4.2x Magnification with LED^{HQ} illumination

- 4.2x Magnification
- LED in HQ with continuous brightness control
- Patented, unique stepless dimming
- All-metal housing

For more information download the product brochure from our website

HEINE BETA® 200 LED Ophthalmoscope

Superior aspherical optics with LED^{HQ} illumination

- Aspherical optical system
- LED in HQ with continuous brightness control
- Exclusive dustproof design
- Aluminium frame system

HEINE K Series

The HEINE-Standard full-size instrument for professionals, far beyond usual market standards. The line is characterised by unbreakable polycarbonate construction and full-feature performance to ensure the highest level of diagnostic accuracy.

If a HEINE instrument is used properly, it will still work like it did on day one even after many years of use. There's a very good reason why HEINE offers a five-year materials and workmanship guarantee on all of he products in this catalogue.

HEINE K180® F.O. Otoscope

The standard, all around Fiber Optic Otoscope

- Fiber Optic Illumination
- Polycarbonate construction
- XHL Xenon Halogen Technology
- Acrylic viewing window with 3 x magnification
- Swivelling viewing window built into instrument

HEINE K180® Ophthalmoscope

A full-featured instrument at an economical price

- Precision HEINE optics. Brilliant retinal image
- Bright, white light. Clear retinal image
- Dust-resistant housing
- Acrylic viewing window with 3 x magnification
- Swivelling viewing window built into instrument

For the ultimate convenience, upgrade your set with an additional handle

HEINE EN200 Diagnostic Centre

Diagnostic instruments located at your fingertips in a space-saving design
Everything in its right place, ready to use. No searching for instruments. Always charged.

Due to cutting-edge technology in the HEINE EN200 the handles switch on and off automatically when taken off or returned to the unit.

Set your brightness level once and it stays there every time you use your instrument.

When not in use and when not returned to the unit, the illumination switches off after 15 minutes.

HEINE mini 3000® Series

Maximum quality with minimum dimensions.

The HEINE mini 3000 series is the successful combination of the high quality features of full-size HEINE instruments and the convenience of pocket sized design.

- **Handy and ergonomic** - compact and ergonomic design guarantees a comfortable operation for the most reliable diagnosis in any examination situation.
- **A quality product with a modern design** - special plastics provide maximum strength and durability in a lightweight and modern design
- **Quality optics and illumination** - high quality optics produce distortion-free and brilliant images of the whole area under examination. The illumination system renders structures and colours accurately and naturally.

Two illumination options. One compact series of instruments without equal.

HEINE LED^{HQ} - Heine's exclusive LED^{HQ} illumination offers virtually unlimited hours of working life. No need to ever replace bulbs. Maintenance-free for a lifetime. Twice as bright as XHL instruments

HEINE XHL Technology - Heine's XHL Xenon-Halogen Technology offers the perfect colour rendering that health care professionals have examined the eye with and depended on for decades.

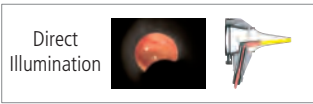

For more information on the HEINE Mini 3000 Series download the product brochure from our website

MEET OUR TEAM: SHARON

SALES - NSW

From working in the Team Medical warehouse to customer service to sales, Sharon has a great understanding of our products and processes and, most importantly, her customers' requirements.

Sharon has an eye for detail and considers our customer relationships more like friendships (in the same way we think of our team as a family). After 9 years with Team Medical, Sharon still takes great joy in servicing her customers in the Hills Districts, the Northern Beaches, and the Central West.

In her downtime, Sharon enjoys cycling, hiking and painting by numbers.

What is your dream holiday destination? New York

What is your favourite animal? Alpacas
