Medisafe Plus Vaccine Fridges

For 10 Years the Medisafe Plus range has been the vaccine fridge of choice for Medical Centres. You won't find a fridge better equipped for the storage of your vaccines.

The Medisafe Plus medical fridges are purpose-built for vaccine storage and follow the "Strive for 5" National Vaccine standard.

All Medisafe fridges come equipped with an AQ Box with Medisafe Plus cloud monitoring. The cloud monitoring acts as an automated data logger which allows you to view and print your temperature chart with min and max data in real time on any web enabled smartphone, tablet, or computer.

- Fully commercial construction
- Superior quality: no domestic fridge components used
- Highly accurate electronic controls (incorporates dual temperature probes and thermostat)
- Digital Temperature control system pre-configured to hold temperature between 2°C to 8°C (approved QCPP specification)
- Equipped with temperature alarms, AQ Box and electronic thermostat
- Adjustable shelves
- 2-Year Warranty

Additional shelves available

Strive for 5

For advice and information on vaccine storage management refer to the Vaccine Storage Guidelines; search online “Strive for 5”.

Strive for 5 refers to the point midway between +2°C and +8°C which is the temperature range recommended for vaccine storage.

So, strive for 5 degrees Celsius (°C).

Invest in a UPS system:
Save time
Save money
Provide peace of mind

UPS and Battery Back Up Pack (Uninterrupted Power Supply)

The Medisafe Plus UPS and Battery Pack is specifically designed for Medisafe Plus Medical refrigeration providing extended power back-up during a power outage.

Rated at 2kVA, this UPS provides sufficient capacity to cope with the draw required to power a 2 door vaccine fridge. The UPS will also regulate power surges, circuit shorts and spikes while providing a consistent power output of 230v at all times.

UPS and Battery pack provides up to 8 hours run time when attached to a medium sized refrigerated cabinet (average 300 L). Units can be combined with an additional battery pack unit (2+) to increase run times of up to 7-8 additional hours per unit.

- Each UPS and Battery Pack comes with a market leading 3 year warranty
- Protection against power outages
- Protection against power variances
- UPS and battery pack is vertically stackable

Specifications	
Dimensions (W x H x D)	UPS: 192 x 318 x 428mm Battery: 192 x 318 x 428mm

Emergency Vaccine Esky 35L

For emergency storage of vaccines and cold chain products.

- More insulation and thicker walls than most fibreglass eskies for longer lasting coolness
- Made from roto moulded food grade U.V stabilised polyethylene - will not chip, crack or break
- Equipped with advanced refrigeration grade Iso and Polyol insulation
- Compact esky size for storage in your practice
- Dimensions: 46.8(L) x 38.6(W) x 38.9cm(H)
- Made in Australia
- 3 Year Warranty

TEAMT35EVE \$325

The AQ Box Cloud Temperature Monitoring System

The AQ Box is an online temperature monitoring and alerting device which automatically records and sends temperature data to the cloud for easy viewing and reporting via a portal. Users log in with their unique username and password to easily view and download or print reports with their nominated date ranges, for ease of compliance with regulatory requirements. Reports available also include the duration of any possible temperature breaches.

The AQ Box is connected to a 10amp power source. However if the power is disrupted, the built-in backup battery will ensure uninterrupted temperature recording of up to 7 hours* during a power outage. The AQ Box ensures that expensive vaccines are protected, your data is secure and that you are meeting the national Australian Government Department of Health's 'Strive for 5' guidelines.

*Back up times are based on a new unit and will reduce with usage.

Dual Temperature Probes

The AQ Box is unlike other monitoring devices on the market which measure the cabinet temperature only. The AQ Box is uniquely equipped with two temperature probes providing accurate measurements of both the cabinet temperature and a simulated product temperature.

Remote Access

Temperature data can be accessed via the AQ Box portal on any web-enabled smartphone, tablet or computer. Each unit comes with 12 months' access to the cloud portal*. Temperature breaches and power failure notifications are sent in real time via text and email.

*Charges are applicable after the initial 12 month term.

**Avem Quirks retains ownership of the AQ Box and will manage all aspects of it.

CleverLogger

Starter Kit - Gateway + Wireless logger

CleverLogger is designed for non-technical users. It measures the temperature and saves the results to the Internet every few minutes.

It is browser-based, so there is nothing to install or update. Clever Logger creates a live log of temperatures that's accessible from anywhere.

It can create PDF or Excel reports and email them to you automatically every day/week/month.

If something goes wrong, Clever Logger will send you an immediate alert.

Max Min Thermometer

DIGMEDIT

\$67.70

The unit incorporates two temperature sensors, a remote water resistant probe with one metre PVC lead for the appliance temperature and an internal sensor for the room temperature. The external probe can be mounted onto the fridge internal wall using the suction pad or mounting bracket supplied.

- Range of -49.9 to 69.9°C
- Large LCD display
- Max/min memory function to record the highest and lowest temperatures
- Programmable high/low audible alarm

Medi-Log™ II Temperature Data Logger

Automatic setting data logger for vaccine storage

- Meets all the latest Strive for Five guidelines and WHO requirements
- Fully self contained, sets its own parameters automatically for vaccines
- Simple one button operation for all functions
- Free software
- Includes Glycol Vial , 2 Meter External probe and USB Cable
- 16,000 reading memory
- Time interval between readings 1 minute to 99 minutes
- Visual on LCD Screen and Buzzer alarm
- Download data using free software suits Windows computers (USB connection cable - included)

Correct Storage and Transport is Paramount.

Because, even one broken link in the chain can mean your vaccines aren't viable.

At Team Medical, we adhere to the 'Strive for 5' National Vaccine Storage Guidelines. Below is a snapshot of what we do to ensure your vaccines are kept at the correct temperature from the moment we receive the stock to when the stock is delivered.

Fully Processed inside Cool Room

By picking and packing every order inside our purpose-built cool rooms, we ensure the required temperature range (between 2-8°C) is continually maintained.

Heat and Freeze Monitors in Every Order

An alarm is triggered if your vaccine get too hot or too cold. Why is a freeze monitor essential? For vaccine compliance, a freeze monitor is a non-negotiable.

Shipped in Eskies or in Validated Cold Trucks

In available regions, we ship vaccine orders with Mediport's validated refrigeration vehicles. All other vaccine orders are shipped in eskies following strict procedures.

24-Hour Monitoring and Back-up Power

Our coolrooms are monitored 24 hours a day using back-to-base data loggers. We have generators on all sites to provide back-up power when a power outage occurs.

Door-to-Door Delivery Tracking

Our dedicated staff track, trace and verify every cold chain delivery, every day. Consignments are checked to ensure arrival at key destination depots.

WE ARE A BUSINESS FOR GOOD

When Team Medical delivers one medical couch in full and on time, we provide food for a day to a farming family through Drought Angels

Many Australian farmers are suffering in silence as they navigate the devastating effects of natural disasters such as floods, fires and droughts. Their finances are stretched to capacity, making it difficult for them to cover day to day living costs.

From July to September, we provided 275 days of food to farming families in need, all thanks to you.

Learn more about our giving impacts at www.teammed.com.au/esg-giving-back

An interesting fact about you? I'm ambidextrous (using right and left hands equally well)

Lindy

An interesting fact about you? My first job was at the Zoo

Darina

What is your favourite takeaway food? Lebanese kebab

Fiona

What are your hobbies? Hiking, knitting & day trips on the motorbike

Helen

What are your hobbies? Running, walking, or competing in triathlons

Kelly

Do you have any special talents? I can say words backwards and remember number plates

Maeve

Streaming any TV shows at the moment? Rewatching Friends

Susan

An interesting fact about you? I'm a beekeeper

Disposable Curtains

Significant cost savings and improved infection control

Haines® Disposable Curtains are designed to replace your existing reusable curtains in healthcare facilities such as hospitals, day surgeries, medical centres and other healthcare facilities that require the use of curtains. They offer a cost effective alternative to purchasing and washing reusable curtains and with their proven ability to inhibit bacterial growth, they can improve infection control at your facility.

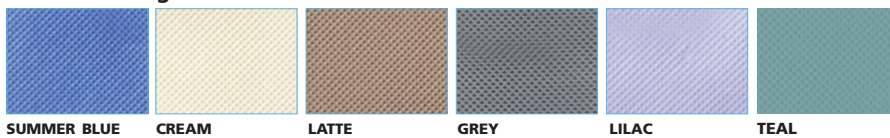

- Manufactured from 100% polypropylene, non-woven fabric – 120gsm
- Fire retardant (AS 2755.2-1985) – Failed to Burn
- Impregnated with anti-bacterial and anti-mildew chemicals including nanometer silver (curtain and mesh)
- Tie Back – sewn on so won't fall off
- Curtains always look fresh, pleated and new.
- Identification Label - each curtain is supplied with an easy to read identification label this is to monitor length of use and provides an easy way to monitor required changes of curtains

Previous studies have demonstrated that pathogens such as Vancomycin resistant enterococci (VRE), methicillin resistant staphylococcus aureus (MRSA) and Clostridium difficile are still present on non-disposable curtains even after one week post laundering (Ohl, M. et al 2011). Even with steam cleaning, the curtains still remained contaminated (White, L.F; Dancer, S.J; Robertson, C; 2007).

Meet our Team: Alec

IT - NSW

Alec started out in the warehouse 9 years ago. It was a natural progression that Alec joined our IT Team after finishing his uni degree. "Team Medical is a great place to work, with a real family culture that values nurturing talent. I feel lucky that I can work in a job I enjoy, for a company that supports my career growth and where I can gain experience working on many different projects."

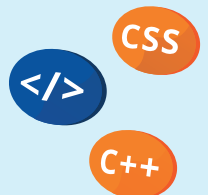

He has his hands on all things computer and system related and has been a critical piece of many of our recent digital innovations.

Alec is not to be messed with at table tennis or Mario Kart during lunch breaks! Alec follows Parramatta Eels in the NRL and loves to play tennis.

What is an app you use almost daily? VDarts

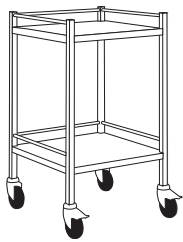

Streaming any TV series at the moment? Boy Swallows Universe

What is one of your pet peeves? When people don't know their passwords

MANAGEMENT - QLD

Meet Our Team: Jake

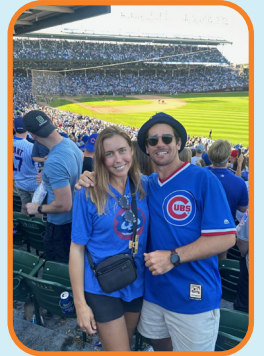

As our National Operations Manager, Jake leads our operations team with his unique blend of enthusiasm, passion and positivity. A big believer in getting things done right the first time in an efficient manner, Jake is constantly on the hunt for new ways to improve our fast, smooth and safe operations.

Always up for a challenge, Jake is running national projects to ensure we have the right infrastructure and continued scalability to grow alongside our growing customer base.

Jake attributes our success to our company culture being built on strong family values and teamwork. *“Every Team Member is valued. Our Team is invested in their jobs and are willing to go the extra mile.”*

You’ll often find Jake fishing, bushwalking, playing soccer, watching a live gig or cheering on his beloved Sydney Roosters in his spare time.

WE ARE A BUSINESS FOR GOOD.

In August, Team Medical rolled over their third year of giving with B1G1. Over the year, we have funded the planting of **over 5132 trees** across the globe. This included **816 tangerine trees for families in Malawi** to generate an income.

While supporting these communities, we also offset kilometres driven by our sales team, as they travel to meet our customers.

Learn more about our giving impacts at www.teammed.com.au/esg-giving-back/

Dexion Maxi Bins

The inherent strength of the Maxi bin comes from the robust design using the best quality polypropylene materials. Maxi bins are most commonly hung on louvred panels, but their unique interlocking design enables them to be stacked securely without the bin splaying under load. This makes them perfect for incorporating within your shelving system or on a bench top.

- Bins can be stacked or hung on louvred panels
- Smooth internal features with curved edges makes bins easy to clean

Maxi Bins (W x D x H)
