Agani™ Hypodermic Needles

latex-free

Agani™ needles feature an ultra sharp lancet point.

The precisely honed edges and unique bevel design easily penetrate tissue with an incision that minimises trauma. Silicone lubrication allows the needle to advance smoothly.

Surflo® Winged Infusion Sets Scalpvein Sets (butterfly needles)

latex-free

The precisely honed edges and double bevel design facilitate smooth penetration with minimal tissue trauma. The thin walled cannula allows for higher flow rates being ideal for rapid infusions and dosages with high viscosity. The tubing is highly flexible and virtually memory-less which greatly reduces risk of kinking and disruption to the flow.

BD Insyte™ Autoguard™ BC Pro Shielded IV Catheter
With Blood Control technology

When you access a vein, you are at risk of a needlestick injury and blood exposure. If you have to apply pressure after removing the needle, the risk of blood exposure increases. Minimize your worries with BD Insyte™ Autoguard™ BC Pro shielded IV catheter with blood control technology.
