ActivHeal® FOAM NON ADHESIVE

ActivHeal® Foam Non Adhesive is a versatile dressing developed to offer protection and absorbency on moderate to heavily exuding wounds.

- ✓ Good absorption of exudate
- ✓ Versatile
- ✓ Low friction backing
- ✓ Reduces the risk of maceration
- ✓ Waterproof and bacterial barrier
- ✓ Conformable
- ✓ Low friction membrane
- ✓ Promotes healing through a moist wound environment

Indications for use:

ActivHeal® Foam Non Adhesive is indicated for moderate to heavily exuding wounds:

- ✓ Abrasions
- ✓ Lacerations
- ✓ Post Operative Surgical Wounds
- ✓ Superficial and Partial Thickness Burns
- ✓ Pressure Ulcers
- ✓ Leg Ulcers
- ✓ Arterial Leg Ulcers
- ✓ Diabetic Ulcers
- ✓ Graft Donor Sites
- ✓ Skin Graft Sites

ActivHeal® SILICONE FOAM LITE

ActivHeal® Silicone Foam Lite is a sterile wound dressing that is soft, thin, discreet and conformable to anatomical contours.

- ✓ Breathable
- ✓ Gentle secure adhesion to the skin
- ✓ Can remain in situ for up to 7 days
- ✓ Minimises pain at dressing changes
- ✓ Perforated wound contact layer
- ✓ Minimises maceration and damage to the surrounding skin
- ✓ Water resistant and bacterial barrier
- ✓ Low friction
- ✓ Easy to remove
- ✓ Maintains a moist wound environment

Indications for use:

ActivHeal® Silicone Foam Lite dressing is indicated for use in the management of non to low exuding, chronic and acute wounds throughout the healing process. The dressing is indicated for use on the following wounds:

- ✓ Trauma Wounds, including: Abrasions, Lacerations, Skin Tears and Blisters
- ✓ Post Operative Surgical Wounds
- ✓ Skin Tears
- ✓ Superficial and Partial Thickness Burns
- ✓ Pressure Ulcers
- ✓ Leg and Foot Ulcers
- ✓ Arterial Leg Ulcers
- ✓ Diabetic Ulcers
- ✓ Radiation Damaged Skin

ActivHeal® Silicone Foam Lite dressings are suitable for use under compression bandaging.

Allevyn Gentle Border

Allevyn Gentle dressing has an advanced triple-layer construction which combines an absorbent hydrocellular pad sandwiched between a perforated Soft Gel wound contact layer and a highly permeable waterproof outer film.

- Extra care for fragile skin
- Silicone gel adhesive ensures minimal pain upon removal
- Secures dressing in place for up to 7 days depending on amount of exudate
- Use under retention or compression bandages

Allevyn Gentle Border

Indications: For use on frail skin and wounds with moderate to high levels of exudate, such as skin tears.

Exudate management - Advanced Foam dressings

The ALLEVYN range of dressings from Smith & Nephew is a comprehensive range of absorbent foam dressings. Trusted with over 25 years of clinical use, the ALLEVYN Range has a history of innovation and putting people first, with a true understanding of the human body and the experience of living with a wound.

Allevyn Classic

Allevyn Non-Adhesive

The polyurethane wound contact layer prevents sticking to a full range of wound types; especially suitable for fragile skin.

- Fast fluid absorption and superior breathability
- Non adhesive wound contact layer
- Waterproof outer film layer
- Sealed and shaped edges reduce leakage
- Full range of sizes

Smith+Nephew

Allevyn Adhesive

- Dynamic breathable top film
- Faster fluid removal and increased breathability
- Optimises a moist wound environment: faster healing of the wound
- Reduced risk of maceration
- Comfortable, convenient and cost effective
- Dressing for moderate to highly exuding wounds for up to seven days

Indications: Venous, arterial and diabetic foot ulcers, pressure ulcers and chronic wounds.

Allevyn LIFE

ALLEVYN Life dressing is a multi-layered design incorporating hydrocellular foam, hyper-absorber lock away core and masking layer which has been designed for people and their everyday life through:

- Unique quadrilobe shape with a wide border designed to fit the contours of the human body
- Allows patients to shower
- Protective masking layer minimises the visual impact of strikethrough
- Excellent fluid locking under pressure
- Provides the patient with peace of mind leakage prevention
- The multi-layered design provides cushioning and helps to spread pressure
- Silicone wound contact layer offers minimal pain and discomfort on removal
- Change indicator optimises dressing change frequency

Smith+Nephew

Designed for people. Designed for life

Meet our Team: Sammy

Sammy has been with Team Medical for 6 years now. She started out in the warehouse before moving into a more flexible casual position to allow time for her to pursue her university studies in Biology. She is invaluable in taking on work to assist both our purchasing and marketing teams. Sammy loves the teamwork aspect of Team Medical, and she is eager to chip in and help the team however she can. She is hard-working, dependable and always down for some fun.

When she's not at work or studies, Sammy loves to unwind playing video games, listening to Taylor Swift, watching anime or going to the gym to pump some serious iron.

Favourite films? I do enjoy every Disney film and I'm a bit of a Star Wars nerd, but my all-time favourite movie is Jurassic Park- who doesn't resonate with dinosaurs, they're super cool!

MARKETING - QLD

3M™ Tegaderm™ Foam Adhesive

High Performance Foam Adhesive Dressing

Highly absorbent, breathable, wound dressing. Designed to allow easy one handed application to difficult body contours, including heel and elbows without the need for cutting. Indicated as a primary dressing for low to highly exuding, partial of full thickness dermal wounds. May also be used as a secondary dressing.

Tegaderm Foam Adhesive

WE ARE A BUSINESS FOR GOOD

To celebrate 3-years of hard work and commitment to Team Medical, Erin T. from customer service made her B1G1 donation to support an early childhood development program in South Africa. This enabled her to provide **10 days of development to help disadvantaged children**. Many children born into disadvantaged backgrounds do not have access to learning centres that stimulate learning.

Learn more about our giving impacts at www.teammed.com.au/esg-giving-back

Meet Our Team: Caitlin

Caitlin is the core engine of our marketing team. Working with our key suppliers and creating great promotions. Making sure our customers are in the loop with the latest products, special offers and business updates.

A big fan of Rugby League, Caitlin's favourite teams are the Sydney Roosters, NSW and the Wynnum-Manly Seagulls. Caitlin loves to unwind by reading a good book or spending time out-and-about with friends and family.

What was the last concert/live event you went to?

Tina Turner the Musical - I saw it on a Work Trip to Sydney and I'm hoping to see it again when it comes to Brisbane later in the year.

What is your favourite food?

Does coffee count? If i have to pick an actual food it would be too hard to choose between sashimi and ice cream.

Mepilex®

Mepilex® is a foam dressing suitable for a wide range of exuding wounds, such as venous leg ulcers or diabetic ulcers.

- Minimises pain and trauma at dressing changes using Safetac® technology¹
- Minimises the risk of maceration²
- Can be cut to fit making it ideal for difficult-to-dress areas
- Soft and conformable
- Requires secondary fixation, such as Tubifast®

10 x 10cm	MOL294100	Box/5	\$49.25*	3+	\$44.50*
10 x 20cm	MOL294200	Box/5	\$97.70*	3+	\$87.65*

Mepilex® Lite

Mepilex® Lite is a thin foam dressing for low-exuding acute and chronic wounds.

- Minimises pain and trauma at dressing changes using Safetac® technology¹
- Minimises the risk of maceration²
- Very soft and conformable – suitable for areas requiring protection of compromised and/or fragile skin
- Clinically proven to significantly reduce the severity of skin reactions from radiotherapy treatment
- Requires secondary fixation, such as Tubifast®

6 x 8.5cm	MOL284000	Box/5	\$29.70*	3+	\$27.45*
10 x 10cm	MOL284100	Box/5	\$44.60*	3+	\$41.15*

Mepilex® Border Flex

High exudate level

Absorbent self-adherent foam dressing with 360 stretch Flex Technology

- Proprietary Flex Technology creates great conformability
- A dressing that moves with the patient and stays on even in the shower
- Safetac® technology means less pain and damage during dressing changes¹
- The five-layer dressing absorbs, channels and traps exudate and allows you to track exudate progress
- Keeps exudate away from the wound bed and prevents re-entry, even under compression

You can use Mepilex® Border Flex to treat a wide range of exuding chronic and acute wounds, such as diabetic foot ulcers, venous leg ulcers, pressure injuries, skin tears and traumatic wounds.

Mepilex® Border Flex is now also available in oval shape because wounds are not square and at times a special shape might be just what you need for that secure fixation.

Square				Oval

Mepilex® Border Flex Lite

Medium exudate level

Thin absorbent self-adherent foam dressing with 360 stretch Flex Technology

- Minimises pain and trauma at dressing changes using Safetac® technology¹
- Very thin and discrete to allow patients to live a normal life
- Thin and conformable to dress wounds on feet and toes, hands and fingers
- Showerproof – with a film backing providing a barrier to virus and bacteria (of size >25nm)

4 x 5cm	MOL581011	Box/10	\$45.65*	3+	\$42.15*

Cutimed® Debriclean

Fast and effective wound debridement

Thorough wound cleansing is the foundation for successful wound healing. Cutimed Debriclean efficiently sets the stage for the wound healing process with its unique and innovative design. Thanks to its combination of gentle looped monofilament fibers and abrasive fibers, bacteria is absorbed and firm slough removed, making Cutimed Debriclean suitable for any wound cleansing challenge.

9 x 13cm BSN7617000
 Box/5 \$130.55

Choose Cutimed® Debriclean for fast and effective wound cleansing

Debrisoft® Monofilament fibre Pad and Lolly

Wound bed preparation – fast, easy, virtually painless.

Debrisoft is intended for rapid and effective debridement of wounds. Debrisoft removes bacteria, dead tissue and exudate during debridement.

Debrisoft is an easy, effective and virtually painless method of debridement that produces rapidly visible results which speak for themselves.

Before debridement

After debridement with Debrisoft

Wound bed preparation is an integral part of every dressing change. Selecting the correct cleansing method is therefore critical for patient acceptance and the success of the treatment.

With Debrisoft you protect newly formed granulation tissue and new epithelial cell growth.

Debrisoft Pad

For shallow wounds and accessible areas of the skin

10 x 10cm LOH33223
 Box/5 \$128.30
 2+ \$125.10

Debrisoft Lolly

For hard-to-reach areas e.g. cavity wounds, between digits and skin folds

160mm x 19mm LOH33224
 (lolly head = 50mm x 19mm)
 Box/5 \$146.90
 2+ \$141.60

Debrisoft enables quick¹ wound bed preparation

Debrisoft is easy¹ to use with all common wound rinsing solutions

Patients perceived low pain during debridement

HydroClean®

Wound Debridement Dressing

HydroClean® is a non-medicated wound dressing for debridement and wound bed preparation. Suitable for wet/moist treatment of wounds, in particular wounds with impaired healing tendency.

HydroClean is especially suitable for the treatment of chronic and poorly healing wounds during the cleansing and granulation stage.

- Unique rinsing absorption mechanism
- Up to 3 day wear time
- Excellent cleansing and debriding effect

HydroClean

HydroClean will require a secondary dressing and retention tape or bandage.

5.5cm Round [HTM609606](#) Box/10 **\$229.00**

7.5 x 7.5cm [HTM609293](#) Box/10 **\$382.95**

HydroClean Cavity

HydroClean plus Cavity will require a secondary dressing and retention tape or bandage.

4cm Round [HTM609622](#) Box/10 **\$131.75**

7.5 x 7.5cm [HTM609628](#) Box/10 **\$295.60**

BLASTX Antimicrobial Wound Hydrogel

A wound management innovation that combines antimicrobial effect with moist wound properties and is conducive to fast healing

BLASTX employs X BIO technology with a combination of ingredients acting as a chelating agent, buffer and moisture protectant. This destroys bacteria within the gel, defends against bacterial reinfection and maintains a moist wound healing environment. The antimicrobial properties of BLASTX Antimicrobial Wound Hydrogel inhibit the growth of microorganisms within the gel.

- Promotes moist healing
- Prevents re-infection
- Kills 99.99% of germs
- Deconstructs Biofilm

Prontosan

Only a clean wound can heal. Experience the Prontosan® Effect.

Traditional irrigation solutions superficially wet wound

Irrigation/Soak with Prontosan® penetrates and cleanses prior to wound dressing

Drop Comparison (surface tension)

Contains two main working ingredients:

Betaine (Surfactant):
A gentle wound surfactant that penetrates and cleanses contaminants from the wound.

Polyhexanide (PHMB):
A preservative, also known for its antimicrobial properties to reduce bacteria.

The Role of Wound Cleansing in Wound Bed Preparation

One of the most important principles of proper wound bed preparation is certainly wound cleansing, as only a clean wound can heal rapidly and without complications.

Avital tissue such as necrosis and fibrin coating, detritus and a high bacterial load can considerably affect wound healing, resulting in stagnation of the wound healing process.

It must be remembered that the treatment of a chronic wound can take several months, and therefore highly effective, gentle and patient-friendly wound cleansing is of great significance. Particular attention should therefore be given to the choice of wound cleansing agent.

Important Criteria for a Suitable Wound Cleansing Agent

- Efficient removal of the "bacterial burden" or biofilm
- Broad "therapeutic range"
- Maintain optimal wound moisture
- Product can be warmed
- Practical application
- Increase in quality of life (elimination of wound pain and odour)
- Rapid and gentle elimination of the "bioburden" (avital tissue)
- Compatible with common wound dressings

Prontosan® especially designed for:

- Chronic wounds
- Post-radiation wounds
- Acute wounds
- 1st & 2nd degree burns
- Fistulas & Abscesses
- Use with negative pressure therapy
- EB Wounds

Prontosan Wound Irrigation Solution

40ml Ampoule	BN400412	Box/30	\$181.80*
350ml Bottle	BN400403	Each	\$33.00*

Lasts up to 8 weeks once opened.
(Excluding single use 40ml solution)

Prontosan Wound Gel

After Prontosan® soak and rinse (see above), you can apply Prontosan® Wound Gel to the wound for further debridement and prolonged cleansing for up to 3 days.

The gel for acute, chronic and burn wounds.

- Reduces healing time
- Removes and prevents biofilm
- Prevents infections
- Facilitates painless dressing changes
- Is compatible with commonly used wound dressings

30ml Bottle	BN400510	Each	\$34.85*
-------------	----------	------	----------

Control and prevent infection in Acute and Chronic wounds with one solution. Cleanse, Debride, Irrigate and Moisten with Microdacyn®.

Wounds Not Healing?

Have you considered adding Microdacyn® to your Wound Care Tool Kit? Microdacyn® is clinically proven to heal wounds faster.¹

With this breakthrough technology now you can control and prevent infection with one solution.

Cleanse, debride and protect wounds with Microdacyn®.

Microdacyn® is a pH Neutral - Super-Oxidised Solution for first-line treatment of Acute and Chronic wounds including burns.

- Broad-spectrum antimicrobial
- Ready-to-use, pH neutral solution
- Rapidly penetrates biofilm killing formations from within
- Does not promote bacterial resistance²
- Non-cytotoxic, preventing harm to delicate cells
- Compatible with most dressings including Ag dressings
- Revolutionary alternative to PHMB, Povidine Iodine and Sodium Chloride Solutions

Microdacyn

60g Hydrogel	TFMDHG60	\$21.90
120ml Spray	TFMDW120	\$21.30
250ml Spray	TFMDWC250	\$29.55

>99.99%

Microdacyn® is proven >99.99% effective against Bacteria (incl MRSA), Fungi, Viruses, Spores and Uniquely Penetrates Biofilm.^{2,5}

Usage and Compatibility

Microdacyn® can be used on:

- Skin
- Mucosa
- Ligament, joints, bones & tendons
- Cartilage & peritoneal cavity
- Sensitive areas such as the face
- Children

Microdacyn® is compatible with:

- All wound dressings including silver(Ag)
- Leaving soaked gauze in the wound
- Wound irrigation
- Under occlusion
- Insertion sites/catheters

Visit our website to learn more about this innovative Wound Care Product.

What do you currently use to cleanse, irrigate and debride wounds?

Microdacyn® has been proven to:

- Heal wounds faster than those treated with Povidine-Iodine solutions³
- Have better control of bacterial load in chronic wounds than PHMB and Saline solutions⁴
- Rapidly penetrates biofilms killing microbes from within⁵

ActivHeal® AQUAFIBER AG

ActivHeal Aquafiber® Ag is a high gelling antimicrobial wound dressing that has the ability to absorb high levels of exudate whilst maintaining a moist wound environment. The addition of silver ions results in a dual purpose dressing that is proven to be effective at exudate management, as well as being effective in eradicating a broad spectrum of microorganisms including antibiotic resistant strains such as MRSA, MRSE and VRE.

Ideal for moderate to heavily exuding wounds:

- Post operative wounds
- Trauma wounds (dermal lesions, trauma injuries or incisions)
- Leg ulcers
- Pressure ulcers
- Diabetic ulcers
- Partial and full thickness burns
- Cavity wounds

Exufiber® Ag+

Transfers efficiently. Removes cleanly.
Prevents biofilm reformation.

- Exufiber Ag+ is a non-woven polyvinyl alcohol fiber dressing **that transforms into a gel** upon contact with exudate healing it to softly conform to the wound bed.
- The tightly packed fibers keep exudate locked in, while the **capillary action enables transfer of exudate to the secondary dressing.**
- Exufiber Ag+ **promotes autolytic debridement** and easily removes in one piece, to support a clean wound bed.
- In contact with liquid, Exufiber Ag+ releases silver ions and inactivates a variety of wound-related pathogens, such as bacteria, fungi and moulds
- By reducing the number of microorganisms, Exufiber Ag+ can prevent the formation of biofilm

Intended use: Exufiber Ag+ is intended to be used on medium to highly exuding wounds, such as venous leg ulcers, diabetic ulcers and pressure injuries.

5 x 5cm	MOL603401	Box/10	\$154.55
10 x 10cm	MOL603402	Box/10	\$325.10

Mepilex® Ag

Antimicrobial foam dressing with Safetac® technology.

- Minimises pain and trauma at dressing changes using Safetac® technology¹
- Soft and comfortable wound contact layer
- Seals wound edges preventing leakage and minimising the risk of maceration
- Inactivates wound related pathogens within 30 minutes with a sustained effect for up to seven days*
- Requires retention, such as Tubifast®

10 x 10cm	MOL287110	Box/5	\$164.60*	3+	\$148.80*

Allevyn AG

Effective exudate management and effective antimicrobial action in one dressing

Allevyn AG is an absorbent antimicrobial three layer dressing consisting of:

An SSD (Silver Sulfadiazine) containing absorbent hydrocellular pad sandwiched between a perforated non adherent wound contact layer and a waterproof outer film.

- Highly effective
- Reduces bacterial load to eliminate barriers to healing
- Long lasting
- Sustained antimicrobial activity for up to 7 days
- Broad spectrum
- Reliable protection

Cutimed® Sorbact®

Safe and effective wound infection management

- Sorbact technology binds and removes bacteria and fungi via a purely physical principle.
- Binds common microbes in the wound bed, including multi-resistant bacteria
- No mechanism of antimicrobial resistance has been described with Sorbact
- No active agents are released into the wound

Experience the effectiveness of Cutimed® Sorbact®.

Watch the video to learn how Sorbact works

Download the product brochure

If you want to learn even more about Cutimed Sorbact's purely physical efficacy and mode of action, visit the Cutimed YouTube channel

Cutimed Sorbact Gel Dressings

Cutimed Sorbact® Gel Dressing combines the Sorbact® wound contact layer with a high moisture-donation water-based gel. The donation is essential for the autolytic debridement capacity in fibrinous, necrotic, and sloughy wounds.

IODOSORB

IODOSORB is a sterile formulation of cadexomer iodine (0.9%) indicated for the treatment and healing of chronic ulcers. The iodine in IODOSORB is bound within the cadexomer smart micro-beads. When IODOSORB comes in contact with the wound, it absorbs exudate and debris and swells, gradually releasing iodine over time.

- Reduces the bacterial count
- Absorbs fluids, removes exudate, pus and debris
- Promotes healing: maintains a moist wound environment
- Forms a gel over the wound surface
- Range of sizes to suit most wound sizes
- Proven to remove wound biofilms

Indications: Chronic, non-healing wounds including leg ulcers, pressure ulcers, diabetic foot ulcers and exuding, infected wounds (in conjunction with systemic antibiotics).

Reliable

Inadine Dressing is a reliable, efficient and non-adherent dressing designed to manage bacterial contamination and prevent infection in both chronic and acute wounds.

Efficient

The Povidone Iodine molecule has a broad spectrum antimicrobial action^{1,2} and has been proven to be effective against MRSA³⁻⁵.

Non-adherent

Inadine Dressing minimises adherence to the wound bed, therefore reducing the risk of damage to the granulation tissue at dressing removal², and in clinical practice has been shown to reduce pain for patients^{6,7}.

Inadine Dressing is indicated to manage bacterial contamination and prevent infection in ulcerative wounds.

Negative Pressure Wound Therapy (NPWT) refers to the use of topical negative pressure to promote healing in acute and chronic wounds. The therapeutic benefits of NPWT include the reduction in bacterial load, an increase in blood flow to the wound and stimulation of granulation tissue formation.

Smith+Nephew

PICO 7

Single Use Negative Pressure Wound Therapy System

PICO is a novel, canister-free, single-use system; offering the ultimate in portable, accessible and affordable NPWT. PICO pump is more than twice as effective at dealing with air leaks, than its predecessor. This vastly improved efficiency could support healthcare professionals in delivering negative pressure and could potentially be used in problematic "hard to seal" awkward areas. New user interface with a dressing full indicator optimises dressing changes.

Indications: Acute and chronic wounds and closed surgical incisions with low to moderate levels of exudate.

Two dressings and one pump kit

10 x 20cm	SN66802002	Box/2	\$418.55
15 x 15cm	SN66802005	Ctn/2	\$418.55
15 x 20cm	SN66802006	Box/2	\$417.00
25 x 25cm	SN66802009	Box/2	\$426.75

PICO 14

Single Use Negative Pressure Wound Therapy System

Kick start hard to-heal wounds.

PICO 14 Single Use Negative Pressure Wound Therapy System (sNPWT) designed to challenge delayed healing in hard-to-heal^{1,2} deep wounds.^{3,4}

PICO 14 sNPWT has an enhanced pump to facilitate use in large and deep wounds with less user intervention⁵

PICO 14 is a novel, canister free, sNPWT system that offers portable, accessible, and affordable NPWT.^{6,7} The PICO 14 system consists of a pioneering silicone adhesive dressing with AIRLOCK™ technology, that effectively delivers NPWT to indicated wound types using a small, simple to use, battery-operated device.^{8,9}

PICO 14 sNPWT has been shown to improve patient outcomes compared to standard dressings and traditional negative pressure (tNPWT)^{1,7,2}, whilst reducing cost compared to standard care.^{1,7}

- Pump duration of up to 14 days
- Aimed for use on deep wounds

Cica-Care

CICA-CARE is designed for temporary use:

In the management of both existing and new hypertrophic scars and keloids and as a prophylactic therapy on healed wounds to help to prevent hypertrophic scarring and keloids.

12 x 6cm	SN66250704	Each	\$118.00	2+	\$108.70
12 x 15cm	SN66250706	Each	\$217.40	2+	\$200.30

Mepiform

The effective self-adherent dressing for scar reduction

Topical silicone has empirically been shown to have a positive impact on hypertrophic scars and keloids. It may take from three months up to a year or more to improve an old scar, depending on the condition of the scar tissue. Mepiform should optimally be worn 24 hours a day.

- Can be cut to size
- Minimises pain and trauma at dressing changes
- No extra fixation is needed
- Mepiform is thin, flexible and discreet
- Can be worn in daily activities
- Can be reapplied
- One Mepiform product can be used for several days

4 x 30cm	MOL293100	Box/5	\$203.25*	3+	\$185.25*
5 x 7.5cm	MOL293200	Box/5	\$96.90*	3+	\$88.30*

+ Tired of changing dressings? Maybe it's **time you changed dressings.**

Smith+Nephew

ALLEVYN[◇] LIFE
Foam Dressing

Research has shown that up to 50% of dressing changes may not be clinically necessary.¹

The EXUMASK[◇] Change Indicator helps you know when the dressing needs changing – reducing frequency of dressing changes, saving time and money.^{2,3}

INDICATOR AT 0%

Dressing can remain in place with strikethrough masked.

INDICATOR 50% FULL

Consider arranging a dressing change in the coming days.

INDICATOR 75% FULL

Time to change the dressing.

Secura No-Sting

No-Sting Barrier Film

SECURA No Sting Barrier Film is a liquid film-forming skin protectant that minimises stinging. With fast drying times of less than 30 seconds, it will create an effective waterproof barrier for up to 96 hours (4 days).

It may be used to protect intact and damaged skin from irritation due to urinary or faecal incontinence, bodily fluids, adhesive trauma and friction.
