

BD PosiFlush SP

Pre-filled Saline Syringe

These pre-filled syringes contain sodium chloride 0.9% and are designed for flushing in-situ vascular access devices. The 3ml, 5ml and 10ml syringes all have the same diameter as a standard 10ml syringe. May be used for flushing catheters when protocols stipulate use of a 10ml syringe to minimise flush pressure (PSI).

- Luer-Lok™ tip for secure connection to the catheter
- Eliminates syringe-induced blood reflux, enhancing catheter maintenance protocol
- Size and shape of the tip cap allow easy handling, ensures no touch contamination of the syringe luer connection
- Eliminates the use of needles, thus reducing the potential for accidental needlestick injuries
- Standardised flush volumes
- Must not be used on a sterile field

SALES - TAS

Meet our Team: Robert

Robert has been servicing the needs of Tasmanian Health professionals for over 25 years. He has a wealth of experience in all aspects of Medical Supplies and Equipment and provides a high level of customer service to all of our customers no matter how big or small.

Robert loves time away from work with his wife and 4 children, spending time at his holiday home in Orford or singing and playing guitar in one of the bands that he is involved with. You might be lucky to one day see him playing in a venue near you?.

Surgi-Prep®

Chlorhexidine and Ethanol Skin Antiseptic Solution

- Better identification, with visually distinct solutions non-skin-staining pink or skin-staining red
- Broad spectrum efficacy including multi resistant S.aureus and multi resistant E.colli
- Choice of volume and application options to suit different healthcare environments
- Pourable format to meet individual patient needs, with less waste

Cleanse, debride and protect wounds with Microdacyn®.

Microdacyn® is a pH Neutral - Super-Oxidised Solution for first-line treatment of Acute and Chronic wounds including burns.

- Broad-spectrum antimicrobial
- Ready-to-use, pH neutral solution
- Rapidly penetrates biofilm killing formations from within
- Does not promote bacterial resistance²
- Non-cytotoxic, preventing harm to delicate cells
- Compatible with most dressings including Ag dressings
- Revolutionary alternative to PHMB, Povidone Iodine and Sodium Chloride Solutions

120ml Spray	TFMDW120	\$21.30
250ml Spray	TFMDWC250	\$29.55

Visit our website to learn more about this innovative Wound Care Product.

What do you currently use to cleanse, irrigate and debride wounds?

Microdacyn® has been proven to:

- Heal wounds faster than those treated with Povidone-Iodine solutions³
- Have better control of bacterial load in chronic wounds than PHMB and Saline solutions⁴
- Rapidly penetrates biofilms killing microbes from within⁵

Alcohol and Chlorhexidine Prep Pads

Impregnated with an alcohol and chlorhexidine solution

Chlorhexidine is a chemical antiseptic and is also bacteriostatic so it kills both gram-positive and gram-negative microbes. Chlorhexidine has been proven to:

- Increase biocidal activity for both bacteria and fungi
- Broadens the spectrum of activity
- Becomes more effective against a wider range of organisms
- Each pad is 6 x 6 cm

RYN401
Box/200 \$8.70*

Alcohol and Chlorhexidine Swab Sticks

Contains 70% Isopropyl and 2% Chlorhexidine

Reynard Swab Sticks are larger than most common swabs which makes it easier for topical cleansing prior to injection.

- Individually sealed in easy-tear packets
- Skin prep sticks of 10cm

RYN408A
Box/50 \$18.10*

ChloroPrep™

2% Chlorhexidine with 70% Isopropyl Alcohol preoperative tinted skin preparation with a one-step applicator.

- Rapid and persistent antimicrobial activity
- Effective against a broad spectrum of microorganisms
- Tinting process allows enhanced visualisation of the prepped area
- Wing design facilitates easy activation and control of solution
- Foam sponge helps control solution flow while facilitating a gentle scrubbing motion

3ml BD600415 Box/25 \$94.55
