# SUSTAINABLE PRODUCTS... it's the E in ESG

You can take steps towards a greener and more sustainable healthcare practice by choosing environmentally friendly products. Explore our range of eco-conscious solutions, and learn more about how you can minimise your practice's ecological impact with your product choices.

# Choose a biodegradable altenative for everyday items

clinell

MUN's Avalon and COATS Biodegradable

Gloves, along with Clinell Universal Wipes featuring Compostable Fibers, undergo a natural decomposition process facilitated by microorganisms. Adapting to various environmental conditions, these products reduce burdens on ecosystems and landfills, aligning with sustainability goals.

#### Switch to a compostable solution

Environ Holloware leads the charge in reducing the environmental impact of single-use plastics by decomposing into nutrient-rich compost. Opting for compostable solutions reflects a commitment to responsible practices, contributing to a healthier planet. Both Environ Holloware and Clinell Biodegradable wipes limit environmental impact with sourcing from readily renewable materials.

#### Did you know?

For a product to be classed as compostable, it must break down into nutrient-rich compost, enhancing soil fertility and fostering an environment conducive to plant growth.

#### Buy locally made products to reduce carbon footprint

Supporting local goes beyond patriotism – it's an eco-friendly choice. Reduce your carbon footprint with Australian-made products like Viraclean and Bactol, manufactured in the Hunter region. Illuminate your practice with planet medical lights

from Byron Bay, and protect your staff with bpositive level 2 face masks, proudly made in Sydney. By choosing locally sourced products, you contribute to a more sustainable future for both your practice and the environment.

#### **Reuse to reduce waste**

The staggering number of disposable instruments ending up in landfills each year is a concern we cannot ignore; in 2023, we alone sold over 500,000 disposable instruments. Consider a MELAG Autoclave as an alternative – a reusable solution that reduces waste and minimises the carbon footprint associated with manufacturing and disposal.

Opting for sustainable practices is not just about caring for the environment; it's also a wise investment in the long-term financial health of your practice.

#### Sustainability – it isn't a passing trend

HEINE stands out in this commitment by prioritising durability in crafting instruments, highlighting that longevity is a key aspect of sustainability. From the innovative use of salvaged materials from World War 2 to the present-day utilisation of recycled refrigerators in the making of instrument handles, HEINE exemplifies a dedication to a circular economy, with only 1.8% of their waste ending up in landfill.

Notably, their recent move to a purpose-built facility demonstrates a forward-looking commitment, achieving an impressive 86% reduction in greenhouse gas emissions between 2021 and 2022. When you choose equipment from environmentally conscious manufacturers, you are investing in products that endure the test of time and uphold rigorous environmental standards.

Join us on this journey towards sustainability, making conscious choices that promote wellness for all – humans and the planet alike.

#### What is Team Medical doing for a greener future?

- ✓ We've installed a 99KW Solar Electricity System in our Sydney Warehouse and Head Office with plans to double the system by mid 2025
- ✓ Wherever possible we ship our vaccine orders in recycled cardboard boxes, in 2023, this saved the use of over 436,000 polystyrene eskies
- ✓ Use recycled paper packaging in place of plastic bubble wrap
- ✓ We offset our carbon with B1G1, every month we:
  - → provide 600 days of solar lighting to families
  - → fund the planting of 220 trees for forest protection
  - → provide income generation for families by funding the planting of 60 tangerine trees
- Plus much more!

Together, let's create solutions for a healthier world, one eco-friendly decision at a time.
