ANKER SOLIX F3800 PORTABLE POWER STATION UPS BATTERY BACKUP 3840Wh | 6000W

The Anker SOLIX F3800 Portable Power Station UPS Battery Backup unit is a high-quality emergency power system designed for medical refrigeration. It provides reliable, quiet backup power to protect equipment and prevent the spoilage of valuable stored medical products in the event of mains power interruption during power outages.

As most insurers typically won't cover losses from spoilage without a UPS device in place, our UPS and Battery Backup system is the ideal solution. It ensures uninterrupted power for your vaccine fridge, safeguarding vaccines and preventing costly losses, allowing your business to run smoothly even during extended outages.

VACCINE FRIDGE EMERGENCY POWER BACKUP SYSTEM!
